2021 sustainability highlights

1. Cloud-based digital signing of documents introduced internally and for clients (private individuals and legal entities).
2. ESG Risk Management
   - Taxonomy integration into business strategy; target setting, product & service development and processes well under way.
   - As a systemically important institution, NLB d.d. started its preparations for ECB Climate Stress tests.
   - ECB & EBA Guidelines in the process of integration into business strategies, risk management framework and internal governance.
   - The Environmental and Social Transaction Framework was prepared and applies to transactions with greatest potential for significant environmental and social impacts.
3. 1st measurement of Carbon footprint for the NLB Group’s own operations for past 3 consecutive years was performed.
4. Over EUR 60 million of EU Taxonomy-eligible long-term loans were approved by the NLB d.d. (the large corporates segment) financing investments in energy infrastructure, telecommunications network, water supply network, construction of cultural and school facilities, and energy efficiency.
5. NLB Group decreased its paper consumption for additional 6% compared to 2020, which means saving 200 trees.
6. On the 10th anniversary of the project “NLB Month of savings”, NLB Skopje organized an environmental challenge in which 101 of plastic was gathered for recycling.

7. 19/6/2021 on this day NLB handed over Bankarium, the 1st and only banking Museum of Slovenia, to the public.
8. In 2021, 361 new employees joined NLB Group:
   - 108 were younger than 30 years,
   - 240 were between 30 and 50 years old,
   - 13 were older than 50 years.
   - 38.5% of the newly employed were men and 61.5% women.
   - 98% of new hires are coming from local communities.
9. Share of women in leading positions in NLB Group

10. The proportion of staff with disabilities stood at 1.5%.
11. 354 employees in NLB Group took parental leave: 320 women and 34 men.
12. An employee in the NLB Group on average spent 20.4 hours on training. A total of 54,441 attendees took part in 1,463 training programmes.
13. NLB d.d. was named ‘Top Employer’ by the Dutch Top Employer Institute for already 7th consecutive year.
14. In our #HelpFrame project, advertisement space has been offered to 258 entrepreneurs in the Region, where NLB Group is present.
15. Individuals and companies in Slovenia could pay donations with no fee for payment to 30 humanitarian organizations.
16. At Christmas season we supported 11 organisations that promote inclusion – whether for children or elderly.
17. Only 1 confirmed incident of corruption in 2021, when contracts with business partners were terminated or not renewed due to violations related to corruption.
18. NLB Group implemented its obligations as a signatory of the UNEP FI PRB. In 2021, we therefore:
   - performed 1st impact analysis and defined top 3 key impact areas for NLB Group and set 4 sustainability targets;
   - prepared 1st Self-Assessment report.
19. NLB Group Sustainability Committee was formed.
20. NLB Group set up and published the NLB Group Sustainability framework (available at: https://www.nlb.si/sustainability).
21. 1st NLB Group materiality matrix prepared.
22. Online training programme “NLB Group on the path to sustainable banking”, available to all employees, was developed and launched.
If you meet me on a highway, you will most probably overtake me. I drive relatively slowly as a conscious decision to optimise consumption of energy – one of many I keep close to my heart as they add sustainable note to my everyday life. What are yours?

In NLB Group, we have put sustainability of our decisions and actions in the very centre of our business and operations. As a systemic player in all our markets, we are namely in the position to truly impact the quality of life in our home region – South-eastern Europe, and to ensure that it becomes not only more prosperous, but also more inclusive, diverse, transparent, and sustainable.

We hold E(nvironmental) dimension of the ESG especially close to our hearts by, amongst other, upgrading our climate-related and environmental risk management, supporting ideas and solutions that aim toward energy transition, and reducing our own carbon footprint. We are deeply aware of the banks’ vital role in fighting climate change by supporting the global transition of the real economy towards net-zero, that is why we not only strive to reinforce, accelerate, and support the implementation of decarbonisation, but also want to lead by example.

Besides environmental issues, we are equally passionate about addressing social and governance topics, we advocate equal opportunities, as well as independent and professional corporate governance. We want to become one of the key drivers of change and sustainability agenda in our part of the world.

In 2022, we intend to explore the content even further and make sustainability activities more tangible throughout the Group. We are prioritising our efforts where we have, or can have, the most significant impact.

However, change doesn’t simply start with banks offering green loans or distance themselves from financing coal-related projects. It starts with us. It starts with you – with the person in the mirror. With every conscious decision you make. With your small habits and little everyday actions, such as reducing the daily commute and driving speed on highways, switching off unnecessary lights and reducing room temperature in our offices and apartments, fully eliminating paper, if not required legally, respecting and promoting diversity and inclusion, while respecting meritocracy, as well as many other, that may seem insignificant, but are in fact a part of a great movement when we put them side by side with your co-workers’, families’, friends’, neighbours’ habits and actions. And this is what we strive for in the NLB Group to become a beacon of sustainable business and operations and one of the most responsible and meaningful companies in the SEE.

Ultimately, here are our families, friends, co-workers, neighbours, sportsmen we cheer for, innkeepers who know how we take our coffee … Here we can breathe with full lungs, create, experience ups and downs, weave ties. Here are our thoughts and our hearts. That is why we wish to see our home to thrive and remain for many generations to come what it is for us: a region of opportunities.

Blaž Brodnjak
CEO
NLB Group at a glance

Who we are and what we do?

The Group, headquartered in Ljubljana, is the largest banking and financial group in Slovenia with a strategic focus on selected countries in SEE, and with a population of approximately 17 million people — our home region. The Group is comprised of the leading and systemically most important bank in Slovenia, NLB, seven subsidiary banks in SEE, several companies providing ancillary services (i.e., asset management, real estate management, leasing, etc.), and a limited number of non-core subsidiaries in a controlled wind-down. The Group utilises a universal banking model and supports its clients through retail, corporate, and investment banking services.

In six markets the market share of member banks exceeds 10% (measured by total assets).

Retail banking

In Slovenia includes banking with individuals and micro companies, asset management (NLB Skladi), and one part of the new subsidiary NLB Lease&Go which deals with retail clients, as well as the contribution to the result from the associated company Bankart.

Corporate and investment banking

In Slovenia includes banking with Key corporate clients, SMEs, and Cross Border corporates. Investment Banking and Custody, Restructuring and Workout, and one part of the new subsidiary NLB Lease&Go that renders services to corporate clients.

Strategic foreign markets

Of operations are in the following countries in the Western Balkans/SE Europe: Serbia, North Macedonia, Bosnia and Herzegovina, Kosovo, and Montenegro. All Group subsidiary banks have a stable market position and strong reputation. The banks in the Group strategic foreign markets offer a full range of financial services to retail and corporate clients.

Meeting stakeholders needs and expectations

NLB Group has set itself the directions and goals of (1) sustainable operations, (2) sustainable financing, and (3) a contribution to society through which it will create value for its stakeholders.

Strong relationships with our stakeholders can only be built through transparent and continuous dialogue, which we wholeheartedly encourage by opening different channels of communication. Consequently, a system for dealing with external communication on environmental and social matters was put in place in 2021.

We see our stakeholders as individuals and groups of people who trust us and have interest in what we do. As such, our stakeholders co-create the environment in which we make business, develop, and grow.

Commitment to the UN Sustainable development goals

Raising focus on sustainable operations and financing, on climate and environmental issues, as well as on other broader aspects of the ESG, is an opportunity for the NLB Group to follow even more closely the UN Sustainable Development Goals (UN SDG) and the Paris Climate Agreement. This will also help the Group meet societal expectations, adapt to changing environments, and manage risks. This is demonstrated already in widespread action taken by the NLB Group. After adopting the Sustainability programme in 2020, the Group entered the next phase of sustainability in 2021. The NLB Group set up and published the NLB Group Sustainability framework and laid the foundations for three pillars of sustainability:
- sustainable finance
- sustainable operations
- contribution to society

Key 5 UN SDGs in the NLB Group focus are:

- SDG 3: Ensure healthy lives and promote well-being for all at all ages
- SDG 7: Ensure access to affordable, reliable, sustainable, and modern energy for all
- SDG 8: Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all
- SDG 12: Ensure sustainable consumption and production
- SDG 13: Take urgent action to combat climate change and its impacts

Commitment to the UN Principles for responsible banking

In September 2020, NLB d.d become the first bank from Slovenia to commit to the UN Principles for Responsible Banking (UN PRB) – a single framework for a sustainable banking industry developed through an innovative partnership between banks worldwide and United Nations Environment Programme Finance Initiative (UNEPFI).

The Bank committed to taking three key steps with the aim to continuously improve its contribution to international societal goals:

- Analyse its current impact on people and the planet.
- Based on this analysis, set targets where it has the most significant impact, and implement them.
- Publicly report on progress.

So far, we have successfully conducted impact and materiality analyses and set targets. The implementation phase of ESG-related targets awaits us in the coming months and years. You can find our first UN PRB self-assessment report in Annex I.

Promoting sustainable economic activities

NLB Group strongly supports the transition to a low-carbon, more resource-efficient, and sustainable economy, and is committed to make a positive contribution to the financial system that supports sustainable growth. In NLB Group, sustainable finance is understood as finance that support economic growth while reducing pressures on the environment and considering social and governance aspects, as well.

NLB Group is committed to supporting financial products and services that pursue and contribute to environmental and social prosperity. NLB Group promotes sustainable economic activities such as renewable energy, energy efficiency, sustainable transport, pollution control and recycling, sustainable agriculture and food production, sustainable forestry, sustainable aquaculture and fisheries, sustainable water management, circular economy, economic and social inclusion, affordable housing and basic infrastructure, health, and education.

ESG risk management

Managing risks and capital efficiently at all levels is crucial for the NLB Group to sustain long-term profitable operations. The NLB Group is engaged in contributing to sustainable finance by incorporating environmental, social, and governance risks into its business strategies, risk management framework, and internal governance. Thus, the management of ESG risks follows the European Central Bank (ECB) and the European Banking Authority (EBA) guidelines and are comprehensively integrated into all relevant processes.

Environmental responsibility

We are committed to improve the quality of life in the region in which we live. Environmental responsibility for us means protecting the environment we live in, by taking decisive steps where we have the influence to make a change. We see two dimensions, which can change for the better because of our Bank’s action:

- Changing our business model and developing banking products and solutions that have a positive impact on the environment. Using the best of digitalization and technological development to offer our client fully digitalized packages. Financing projects which co-create a low-carbon society and economy.
- Changing our behaviour. In 2021, we conducted the first measurement of CO2 emissions for the whole Group with the aim of better understanding our impact, and thus implement all possible solutions to reduce it in the coming years. We measure our paper consumption and have ambitious targets for reduction, all with the help of the digitalization of operations.

Social responsibility

Social responsibility has been at the heart of the Group’s business model for a long time. The Bank pays special attention to knowledge and lifelong learning. The key pillars of the socially responsible operations of the Group are care for its employees and protection of lawfulness and integrity, as well as the promotion of entrepreneurship, increasing financial literacy and mentorship, support to professional and youth sports, humanitarian activities, and the protection of cultural heritage.

Corporate sustainability governance

Sustainability is anchored at different levels within the bank (Management Board level, Executive Management level, Group level and Business & Country level), guaranteeing that it receives attention from the highest decision-making bodies while also being broadly integrated in our daily operations. In Q3 2021, the NLB Group Sustainability Committee (‘SC’) was established. The SC acts primarily as a consultative body and as a decision-making body of the Management Board of NLB d.d. Therefore, NLB has put in place a 4-level NLB Group Sustainability Governance Structure, as follows:

1. The Supervisory Board of the NLB
2. The Sustainability Committee
3. The Sustainability Team
4. Sustainability working groups
Our sustainability position & goals

In 2021, the Bank, as a signatory to the UNEP FI PRB, a unique framework aiming at aligning bank’s strategy and practice with the UN SDG and the Paris Climate Agreement, conducted an impact analysis.

In contrast to the materiality analysis, which pinpoints material topics for the Group’s operations based on stakeholders’ input, the conducted impact analysis expands the view by also including countries’ needs and banks’ performance. The impact analysis thus identifies the most significant positive and negative impacts of our portfolio to the societies, economies, and environment in which the bank operates. By determining significant impact areas, we were able to set tangible targets, which represents the second out of six principles for responsible banking, to which we adhere. Reflecting our commitment to embed sustainability in our business, we included all Group members in the analysis, as well as target-setting.

**Principle 1: Alignment**
We will align our business strategy to be consistent with and contribute to individuals’ needs and society’s goals, as expressed in the Sustainable Development Goals, the Paris Climate Agreement and relevant national and regional frameworks.

**Principle 2: Impact & Target Setting**
We will continuously increase our positive impacts while reducing the negative impacts on, and managing the risks to, people and environment resulting from our activities, products and services. To this end, we will set and publish targets where we can have the most significant impacts.

**Principle 3: Clients & Customers**
We will work responsibly with our clients and our customers to encourage sustainable practices and enable economic activities that create shared prosperity for current and future generations.

**Principle 4: Stakeholders**
We will proactively and responsibly consult, engage and partner with relevant stakeholders to achieve society’s goals.

**Principle 5: Governance & Culture**
We will implement our commitment to these Principles through effective governance and a culture of responsible banking.

**Principle 6: Transparency & Accountability**
We will periodically review our individual and collective implementation of these Principles and be transparent about and accountable for our positive and negative impacts and our contribution to society’s goals.

*Picture 1: United Nations Environment Programme Finance Initiative’s Principles for Responsible Banking*
Methodological outline
By using the UN Portfolio Impact Analysis Tool for Banks, we made the following key methodological steps:

1. Portfolio classification
2. Establish Country needs
3. Determine significant impact areas
4. Performance evaluation
5. Prioritisation of Impact Areas
6. Target-setting

Picture 7: Steps in conducting impact analysis and target-setting.
Impact areas

Firstly, we analysed our portfolio and identified different business activities and the countries of operation, followed by identifying Group Members’ country’s needs. For some countries, the country needs are predefined by the UNEP FI Impact Analysis tool. However, in our case, none of the six countries of our operation is included any predefined data, which is why we used the best available sources (UN SDG, World Economic Forum, World Bank, etc.). The latter are also used by the UNEP FI to identify the country performance for each of the 52 indicators. Adding sector/client impact mapping as a third dimension, next to banking portfolio and country specific needs, the final list of the key impact areas as depicted below, was prepared by aggregating the top three positive and negative associated impacts areas per business line:

- employment,
- inclusive, healthy economies,
- resource efficiency/security,
- climate,
- economic convergence,
- information,
- integrity & security of person,
- strong institutions, peace, & stability,
- health & sanitation,
- soil,
- housing,
- waste,
- justice.

Following the performance evaluation, we have then prioritised the impact areas. With the aim for key impact areas to comprehensively reflect our banking operations, i.e. the context and specifics of our Region, we also included a materiality analysis in the prioritisation process, so, the overall score is based on three dimensions: performance, country needs, and materiality.

In line with the UNEP FI PRB methodology, the most significant impact the Group has with its products and services on societies, economies, and environments, are in the following areas:

- Climate
- Resource efficiency & security
- Inclusive, healthy economies

**Climate**
Composition of the global atmosphere and its exposure to greenhouse gas (GHG) emissions as a direct factor contributing to climate change.

**Resource efficiency & security**
Efficient use of limited, non-renewable natural resources (which cannot be regenerated after exploitation) and renewable natural resources (which can return to their previous stock levels by natural processes of growth or replenishment) in the process of exploiting nature for production and consumption purposes.

**Inclusive, healthy economies**
Development and creation of sustainable, diverse, and innovative markets, that add value to society and the economy. This includes under-served social groups’ full and fair accessibility to labour markets, finance, and entrepreneurship and, more generally, economic opportunity. It also includes, but is not limited to, access to affordable, effective, and safe financial services for individuals as well as micro, small, and medium-sized enterprises.
Material issues

With the goal to highlight and transparently showcase the sustainability issues having a significant impact on NLB’s performance, as well to report on our impact on people and environment, we conducted a materiality analysis. The process of materiality analysis is intended to identify, evaluate, and prioritise essential ESG issues, which could affect NLB’s performance and our stakeholders. As such, the materiality analysis was carried out in the next phases:

1. **Stakeholder mapping**
   Stakeholder mapping was carried out as the first step of the materiality analysis, as it is essential to understand, which stakeholders’ group are the most relevant to bank’s operations. Our analysis was based on analysis of our own operations, peers’ analysis, and overview of key actors in banking sector. Based on this input, the recognised six main stakeholder groups are: employees, private and business clients, suppliers and contractual partners, regulatory authorities, and investors.

2. **Identification of ESG material issues**
   Identification of ESG material issues has been based on the following input:
   - SASB sector/industry ESG specific issue
   - GRI aspect list
   - NFRD\(^2\) requirements
   - our own knowledge and understanding of regional environmental and social factors.

   We have additionally also reviewed our peers reports who are working in the same geographical and cultural area. Based on this, we listed 17 material issues for NLB Group’s responsible operation and sustainable development:

   - Respecting human rights
   - Fighting against corruption and bribery
   - Improving customer satisfaction
   - Tax transparency
   - 2022 sustainability aspirations
   - General information on NLB Group’s sustainability report 2021
   - Annex I UN PRB self-assessment report
   - Annex II NLB Group carbon footprint verification opinion
   - Annex III Index in accordance with GRI standards

---

\(^2\) SASB – Sustainability Accounting Standards Board
\(^3\) NFRD - Non-financial reporting directive
• Establish comprehensive corporate governance mechanisms including the Corporate Governance Policy of NLB, governance of sustainability issues, etc.
• Ensure Board of Directors and Board of Directors Committees’ procedures, independence of Board members, compliance with the corporate governance code for listed companies, etc.
• Apply Board and Senior Management oversight of sustainability.

• Establish comprehensive risk management (incl. credit, market, operational risk etc.).
• Assess and incorporate ESG risks in all products, as well as in customer assessment.
• Analysis of risks associated with climate change that could affect the Bank’s operations and facilities.

• Achieve financial targets and generate income for shareholders.
• Establish economic resilience and generate economic value for the environment, economy, and society.
• Foster inclusive and sustainable economic growth.

• Integrate environmental, social and governance (ESG) criteria in financing and investment activities and offer responsible products that promote energy transition, low carbon technologies and circular economy (e.g., green/social/sustainability loans, green bonds, etc.).

• Design modern digitised and lean systems across internal operations.
• Transform business activities around digital trends and embed new technologies, as well as an end-to-end approach in product development.
• Create innovative business models and customer service, as well as a modernised branch network.

• Create the right conditions to attract, develop, and maintain a talented workforce free from discrimination (e.g., gender, age, race, religion, disability, etc.).
• Establishment of a long-term, stable employment environment.
• Provide competitive compensation, quality benefits, opportunities for training, and professional development.
• Maintain an inclusive work environment and promote gender equality by setting gender percentage targets and initiatives to achieve inclusion and diversity objectives.

• Improve the overall environmental footprint of the NLB Group’s operations, including its carbon footprint.
• Take measures to improve energy efficiency, reduce energy consumption, increase recycling of waste and paper, etc.

Enhance customer experience by making banking personal, instant, relevant, and accessible.
• Provide products and services to ensure optimal customer service and satisfaction across the bank for all channels, monitor the state of clients’ satisfaction with surveys, establish complaint resolution mechanisms.

• Propose and offer appropriate products and services to customers.
• Provide comprehensive and transparent information to customers about their rights, features, pricing, and terms of products and services.
- Comply with the anti-bribery and anti-corruption legislation, and regulatory environment and prevent financial economic crime such as money laundering, terrorism financing, tax fraud, bribery, and corruption.
- Establishment of an anti-corruption compliance programme (e.g., transaction monitoring and screening of new and existing clients).

- Conduct business with the highest level of integrity and comply with all applicable laws, regulations, and standards.
- Establish mechanisms that contribute to detect and confront any such incompetence in NLB Group’s business operations and ensure that employees comply with all internal principles, codes, policies, and values of the Bank.

- Prevent illnesses and accidents resulting from work and promote employee well-being.
- Implement measures to ensure that the work environment is safe, and the employees have adequate working conditions.
- Promote a healthy work-life balance, embed a family friendly workplace culture and establish programmes and benefits to support employees.
- Take proactive measures to address the effects of the Covid-19 pandemic.
- Develop suitable plans to deal with threats, incidents of violence, and robberies in the Branches.

- Integrate environmental, social, and governance (ESG) criteria in NLB Group’s supply chain.
- Conduct assessment and screening of suppliers to ensure compliance with the principles on human rights, forced labour, child labour, fair labour standards, environmental protection, and anti-corruption.
- Establish appropriate mechanisms to secure customers’ data in outsourcing agreements.

- Protect customer personal data and confidential information.
- Ensure complete management of threats from cyberattacks, avoidance of unauthorised collection and use of sensitive data.

- Offer products and services that are widely accessible and aid vulnerable customers and groups with disabilities.
- Provide loans linked to affordable housing or basic infrastructure improvements.

- Create positive impact to the local communities in which it operates, as well as to the wider society.
- Enhance social investments, sponsorships and financing of actions and projects that support society.
- Promote employees and suppliers from local communities.

- Respect human rights and comply with international labour practices.
- Manage potential human risks in NLB Group’s portfolio and ensure that financing activities do not contribute to human rights violations.
- Provide access to decent work, create higher living standards, and promote human rights across the supply chain.
- Grievance mechanisms addressing human rights and labour practices (e.g., freedom of association, collective bargaining, forced or compulsory labour, child labour, etc.).
## Evaluation & Results

Evaluation has been done in two parallel tracks: one with the NLB Group internal stakeholders, i.e., primarily Senior Management, who assessed the material issues according to their impact on company’s sustainable operation, as well as their impact on economy, society, and the environment. And secondly, through the online survey sent to the designated external stakeholders throughout the six countries, where we are present, who evaluated each one of the 17 material issues to determine the importance of these issues for NLB Group’s sustainable operation.

The final ranking and shortlisting of top eight material issues is thus a result of combination of internal and external stakeholder’s evaluation process:

1. Digitalization and Innovation
2. Sustainable Finance
3. Customer Privacy and Data Security
4. Corporate Governance
5. Financial Performance
6. Service Quality and Customer Satisfaction
7. Systemic Risk Management
8. Employees Attraction, Development, Diversity, and Inclusion.

## Implementation

<table>
<thead>
<tr>
<th>8 relevant material issues</th>
<th>Outline of NLB Group activities for 2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>Development and implementation of new products for our clients, supporting transition towards low-carbon society and circular economy, and offer fully digitalized financial services, i.e., no physical form factor involved. By exploiting digitalization, we will continue to increase share of paperless operations.</td>
<td>1. Digitalization and Innovation</td>
</tr>
<tr>
<td>Close monitoring of EU Taxonomy development and further implementation in business operations. Focusing on acquiring new sustainable projects and expanding our portfolio throughout the Group, all in parallel with applying adequate sustainable risk management framework.</td>
<td>2. Sustainable Finance</td>
</tr>
<tr>
<td>Keep focus on maintaining the highest standards regarding customer privacy and data security by paying high attention to preventative measures and management of cyber risks arising from the increased volume of digitalised services and work from home.</td>
<td>3. Customer Privacy and Data Security</td>
</tr>
<tr>
<td>Continue to adhere to all national and international governance principles, mechanisms, and code of conducts with the highest diligence.</td>
<td>4. Corporate Governance</td>
</tr>
<tr>
<td>Maintain and solidify our regional presence and continue to fulfill and exceed financial expectations of our shareholders.</td>
<td>5. Financial Performance</td>
</tr>
<tr>
<td>Continue to foster open dialogue with our clients 24/7 to send their opinions on their experience with the Bank, proposals on the banking services, events, and any other issues. By doing so, we will proceed with identifying future needs and being able to respond to them quickly.</td>
<td>6. Service Quality and Customer Satisfaction</td>
</tr>
<tr>
<td>Risk management in the Group is implemented in accordance with the set strategic guidelines, internal policies and procedures. The management of ESG risks follows ECB and EBA guidelines with tendency of their comprehensive integration into all relevant processes. The availability of ESG data in the region where the Group operates is still lacking. Nevertheless, the Group strives to obtain relevant clients’ data as prerequisite for adequate decision-making and corresponding proactive management of ESG risks. The Group will continue with these activities in the year 2022 to further enhance its existing risk management framework.</td>
<td>7. Systemic Risk Management</td>
</tr>
<tr>
<td>Continue to adhere to all national and international governance principles, mechanisms, and code of conducts with the highest diligence.</td>
<td>8. Employees Attraction, Development, Diversity, and Inclusion</td>
</tr>
<tr>
<td>Novelty focus will be on exploring and understanding the corporate culture in all banks in the group, where several KPI will be monitored, and attention given to operational excellence and human talent development.</td>
<td></td>
</tr>

## Target-setting

### UNEP FI PRB impact analysis: Target setting

<table>
<thead>
<tr>
<th>Impact area</th>
<th>Impact area description</th>
<th>External perspective/ country context</th>
<th>NLB Group target</th>
<th>KPI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Climate</td>
<td>Composition of the global atmosphere and its exposure to greenhouse gas (GHG) emissions as a direct factor contributing to climate change.</td>
<td>Although the SEE contributed only 0.7% of global carbon dioxide (CO2)-equivalent emissions in 2016 (Global Carbon Atlas, 2018), they are already facing severe effects from climate change, such as droughts and floods, which are likely to increase with global warming. SEE’s annual CO2-equivalent per capita emissions still rank below the EU average of 6.4 tonnes. The highest values are in Bosnia and Herzegovina and Slovenia, which reach 6.3 and 6.2 tonnes, respectively; (IRENA, Renewable energy market analysis SEE, 2019).</td>
<td>By the year 2030, the volume of new sustainable corporate financing in the NLB Group will be at least EUR 785 million.</td>
<td>Transactions in line with EU Taxonomy (eligibility criteria)?</td>
</tr>
<tr>
<td>Resource efficiency/security</td>
<td>Efficient use of limited, non-renewable natural resources (which cannot be regenerated after exploitation) and renewable natural resources (which can return to their previous stock levels by natural processes of growth or replenishment) in the process of exploiting nature for production and consumption purposes. Can also be read as resource security.</td>
<td>By 2030, energy efficiency in the EU has to improve by 32.5%. For now, the rest of the SEE economies need to comply with the energy efficiency requirements of the Energy Community, which is set for update and extension towards 2050 (IRENA, Renewable energy market analysis SEE, 2019).</td>
<td>By the year 2030, 75% of all electric energy used in the NLB Group will come from zero-carbon sources.</td>
<td>Supplied electricity production energy mix.</td>
</tr>
<tr>
<td>Inclusive &amp; healthy economies</td>
<td>Development and creation of sustainable, diverse and innovative markets that add value to society and the economy. This includes under-served social groups; full and fair accessibility to labour markets, finance and entrepreneurship and, more generally, economic opportunity. It also includes, but is not limited to, access to affordable, effective and safe financial services for individuals, as well as micro-, small, and medium-sized enterprises.</td>
<td>The state of financial inclusion in SEE has seen some improvements over the last decade. The Global Findex Database (World Bank) shows that an average of 69% of adults in SEE report having an account at a bank or another type of financial institution in 2017, compared to 59% in 2011. However, this figure is still relatively lower than that of the wider Europe with an average of 84%.</td>
<td>By the year 2025, the NLB Group will decrease the number of paper prints in its operations by 50% compared to the year 2019.</td>
<td>Number of prints.</td>
</tr>
</tbody>
</table>

By 2025, the share of active digital retail users in the NLB Group will be 55%. Number of active digital users in retail (active digital user is an active user, who had at least 1 login in the past 3 months to digital channels (mobile or web)).

More information on our first self-assessment report as per the UNEP FI PRB can be found in Annex I.

---

Stakeholder engagement

Strong relationships with our stakeholders can only be built through open, honest, and continuous dialogue. We see them as individuals and group of people who trust us and have interest in our business and operational activities. Our stakeholders co-create the environment in which we operate and enable us our development and growth.

The process of materiality analysis has identified the below stated key stakeholder groups:

- Investors
- Employees
- Stakeholder group
- Frequency

### Stakeholder group

4. Feedback about annual evaluation. | Onsite meetings  
Virtual meetings | 1. Usually once a year  
2. As needed  
3. As needed  
4. Once |
| Regulatory authorities           | 1. Supervisory Review and Evaluation Process (SREP)  
2. Regulatory reporting  
3. Reporting in accordance with the Banking Act (ZBan-3) and Companies Act  
4. Whistle-blowing procedure  
5. On-site inspections and Audit reviews of the European Central Bank and the Bank of Slovenia. | Two-sided conversation with Joint Supervisory Team (JST) members via email, telephone calls, online events, presentations, reporting, and other ad hoc meetings or requests.  
Regular JST meetings with Management Board and Supervisory Board.  
Presence of JST members on Supervisory Board sessions (and Audit Committee, Risk Committee, CPSIT Committee, Nomination Committee, Remuneration Committee).  
Presence of JST members on General Meeting of Shareholders  
Onsite visits of inspectors in the NLB premises. | Communication on daily basis.  
At the individual events mentioned above. |
Next to above mentioned, we also regularly interact and are members of the following professional and business associations:

- Sustainable finance working group at the Slovenian Banking Association,
- Sustainable finance expert group at the European Banking Federation,
- CER – Sustainable business network Slovenia,
- Commission for Sustainable growth at AmCham Slovenia,
- UNEP FI PRB working groups.

Furthermore, NLB has a representative at the European banking federation Sustainable expert group and a representative at European banking federation’s Chief Sustainability Officers Round table, which is a forum of banking representatives forming a platform to develop a future role of sustainability officers within financial institutions.

We believe that our active involvement and continuous dialogue foster capacity building and know-how, not only among the actors themselves, but also has the power to expand to public, and so contribute to greater public awareness of sustainability-related topics.
NLB Group sustainability governance

According to the Articles of Association of the NLB d.d. the bank has a commitment to consider the environmental and social impacts of its business, with the aim of ensuring sustainable development of the bank, included as one of the goals of the bank (nlb.si/corporate-governance).

Sustainability is anchored at different levels within the bank (Management Board, Supervisory Board and Group level, as well as Business & Country level), guaranteeing that it receives attention from the highest decision-making bodies while also being broadly integrated in our daily operations.

In Q3 2021, the NLB Group Sustainability Committee was established. The Sustainability Committee acts primarily as a consultative body and as a decision-making body of the Management Board of NLB d.d. Therefore, NLB has put in place 4-level NLB Group Sustainability Governance Structure, as follows:

- **Supervisory Board of the NLB**
  - The Bank has established a comprehensive framework for sustainable management, starting by sponsoring the matter at the level of the NLB SB, which, significantly contributes to the implementation of sustainability. The SB regularly monitors the implementation of ESG factors and discusses the topic on regular basis.

- **Sustainability Team**
  - It is composed of the highest-level officers and provides the overall vision and sustainability strategy, it defines key policies, reviews progress on major initiatives, decides on specific external partnerships and agreements, and ensures cohesion of the overall programme with the Bank’s mission.

- **Sustainability working groups**
  - Ad hoc working groups are being set up in the bank to introduce various elements of sustainability. Their composition varies according to the area of sustainability considered. ESMS Officers have been appointed in our banking members and report regularly to local boards. They come from within the risk management line and ensure the ESMS is properly implemented organisation wide.

- **Rules of procedure of the NLB Group Sustainability Committee**
  - Rules of procedure of the NLB Group Sustainability Committee (SC) lay down the powers and responsibilities of the Committee and its members, as well as the work and decision-making procedures.
  - SC is chaired by our Chief Executive Officer of NLB d.d. SC’s membership is drawn from senior officials across all areas of the bank, including Sustainability, CSA & Cross-border Financing, Large Corporates, Small and Mid-Corporates, Group Steering, Strategy, and Business Development, Legal and Secretariat, Financial Markets, Global risk, Credit risk-

- **Sustainability Team within Strategy and Business Development Division of the NLB oversees Group-wide sustainability agenda and it is tasked with driving the culture, coordinating initiatives, measuring the impact and reporting on progress. The team monitors implementation of the strategy and regularly informs the Sustainability Committee, the MB and the SB on progress.

Retail and Corporate, Evaluation and Control, Group Real Estate Management, Procurement, Human Resources and Organization Development, Sales Development and Management, Communication. The Sustainability Team reports quarterly to the Supervisory Board of the NLB d.d. on progress made with implementing the ESC-related commitments, requirements, and targets.

For more information on the NLB Group sustainability governance please refer to Annex I (Principle 5).
Three pillars of NLB Group sustainability in 2021

Our sustainability program is supported by 3 pillars- Finance, Operations and CSR

- Sustainable finance
- Sustainable operations
- Contribution to the society

NLB Group records sustainable financial performance and actively contributes to a more balanced and inclusive economic and social system.

Strong supporting foundations:
Caring for the environment motivates our actions.

Given a choice, most people would choose a more environment-friendly lifestyle. Yet, many of them lack sufficient knowledge of how to implement those practices into their daily lives and doing business. So, we devised a strategy to educate our clients and incorporate sustainable practices into our lending, investments, banking products and services. For us, it is the most important way we can support national and global sustainable development goals. This is a change we’re happy to see, a shift toward a healthier environment.
Sustainable operations

By introducing the NLB Group Sustainability Framework in 2021 (nlb-sustainability-framework.pdf), the NLB Group officially committed itself to integrating sustainability into its banking operations. Sustainable operations are one of three key pillars of our sustainable performance. In terms of managing our Sustainable operations the most important step in 2021 was measurement of carbon footprint, whereas we continue with paper use measurement and reduction plans.

NLB Group carbon footprint

We take our commitments seriously, which is why measurements have been done for past three years, i.e., the period from 2019 to 2021. With 2020 in 2021 being special years due to global pandemics, we set 2019 to be our baseline year. Year 2019 represents a pre-COVID year, when all operations were fully operative. In the upcoming years (in this case 2020 and 2021), certain measures have been introduced, such as home office, which already have influence also to the level of emissions, so we wanted to obtain a clear baseline year.

Carbon footprint methodology

Aiming to report GHG emissions according to internationally recognized and neutral standards, the Group followed the guidelines of the Greenhouse Gas Protocol (GHG Protocol). For our purpose we referred to:

- Corporate standard (Corporate Accounting and Reporting Standard)
- Corporate Value Chain (Scope 3) Accounting and Reporting Standard.

We followed all key principles as introduced by the GHG Protocol and performed the next steps:

1. Setting of methodology
2. Data collection
3. Data modelling
4. Interpretation of results & setting of KPIs
5. Carbon footprint report verification
6. Disclosure and reporting

The Group’s carbon emissions calculations consist of:

- **Scope 1 emissions (direct emissions from owned and controlled sources):**
  - Combustion of fuels.
  - Company owned vehicle fleet (internal combustion engine).
  - Company controlled fleet (internal combustion engine).
  - Refrigerants (for HVAC systems).

- **Scope 2 emissions (indirect emissions from the purchased energy):**
  - Electricity consumption (both location and market-based).
  - Owned vehicle fleet – electric vehicles and PHEV (included in electricity consumption).
  - District heating.

- **Scope 3 emissions (indirect operational emissions):**
  - employee commuting using own vehicles, public transport (bus, train), taxi – Category 7 of GHG Protocol.

Note that Komercijalna Banka Beograd was included in reporting of GHG emissions also for 2019 and 2020, despite becoming part of NLB Group in 2021. However, GHG Protocol suggests recalculating baseline year in case of structural changes, therefore, data for Komercijalna Banka was included in this report.
25

</table>

Based on the analysis, we learned that most emissions are related to emissions from electricity use. The main reason is that emission factors for electricity in the Region are among the highest in Europe with low penetration of renewables and underdeveloped market for low carbon electricity. While average emission factor per kWh of electricity accounts for around 0.25 kg CO2/kWh, the Region where NLB is operating experience emission factors high above 0.5 kg CO2/kWh. Further on, space heating emissions were increasing in 2020 and 2021 due to climate conditions, where year 2021 was at least 10% colder compared to 2019. Please note, that Scope 3 emissions include only employee commuting related emissions. In 2020, they were reduced by 17% compared to 2019, 18% respectively in 2021. The key reasoning is lower travel to/from work and higher share of employees working from home due to pandemics. A comparison of emissions for years 2019 and 2020 for NLB Group with or without Komercijalna Banka Beograd showed a difference of 29%.
CO₂ reduction measures

Being aware of our Carbon footprint, the Bank decided for immediate and efficient measures to reduce CO₂ emissions from its operations.

NLB Group CO₂ reduction measures

<table>
<thead>
<tr>
<th>Field of operations</th>
<th>Measure category</th>
<th>Measure description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emission factors</td>
<td>- Zero-carbon electricity supply</td>
<td>- Review of all contracts with electricity suppliers on all markets with the aim to guarantee zero-carbon electricity supply.</td>
</tr>
<tr>
<td></td>
<td>- Renewable electricity self-sufficient supply</td>
<td>- Where possible, set up of solar PV on Bank’s buildings.</td>
</tr>
<tr>
<td></td>
<td>- Where possible, rent out roofs/solar panels for self-sufficient supply of renewable electricity.</td>
<td>- Where possible, set up of solar PV on Bank’s buildings.</td>
</tr>
<tr>
<td></td>
<td>- Purchase of electricity directly from renewable electricity producers in the Region.</td>
<td>- Purchase of electricity directly from renewable electricity producers in the Region.</td>
</tr>
<tr>
<td>Energy consumption</td>
<td>- Energy Efficiency</td>
<td>- Energy performance screening of buildings with the goal of higher energy efficiency level in the buildings (especially insulation, window, LED lighting).</td>
</tr>
<tr>
<td></td>
<td>- Cooling</td>
<td>- Refrigerants with lowest CO₂ equivalent emission to be selected.</td>
</tr>
<tr>
<td></td>
<td>- Fleet</td>
<td>- Electrification of internal fleet (Sustainable mobility).</td>
</tr>
<tr>
<td>Use of space</td>
<td>- Building management</td>
<td>- Analysis of office use and preparation of measures to optimize heating/lighting use.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Divestment of real estates.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Optimization of space-demand in buildings.</td>
</tr>
<tr>
<td>Employee’s commute</td>
<td>- Behavioural changes</td>
<td>- Stimulation of work from home.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Stimulation of use of public transport, cycling and walking.</td>
</tr>
</tbody>
</table>

Please be informed, that at the beginning of the year 2022 we took immediate action to decrease our carbon footprint by implementing the most impactful measure, i.e. revision of contracts with electricity suppliers. We guaranteed zero-carbon electricity supply where possible, aiming at substantial decrease of CO₂ emissions in year 2022 and consequently mitigated the emission factors for electricity as currently the major cause of our carbon footprint from own operations.

In 2019, NLB established electric mobility partnership with Avant2Go. Share of NLB employees in Ljubljana who can use this e-car sharing solution is increasing daily, and we are proud to promote solutions which decrease the level of traffic in cities and support sustainability. In 2022, specific measures to reduce the carbon footprint resulting from the mobility needs within the NLB Group will be evaluated, aiming at establishing a clear framework and target systems to continuously lower NLB Groups fleet emissions.
Verification

The carbon footprint of the Group was verified by the external and independent institution, Jožef Stefan Institute (Energy Efficiency Centre). The verifier issued a positive opinion of the NLB Group carbon footprint report of results and approved that:

- the report has been prepared according to GHG protocol (guidance for corporate reporting on Scope 1, 2, and 3 GHG emissions) and verified according to requirements of standard ISO 14064-3:2019: Greenhouse gases – part 3: principles and requirements and provides guidance for verifying and validating greenhouse gas (GHG) statements;
- the report accurately and completely represents GHG emissions Scope 1, 2, and 3 (limited) of the NLB Group for period from January 1st, 2019, to December 31st, 2021.

You may find the Verification certificate in the Annex II of this report.

Paper consumption

The paperless collaboration project started in 2020 with a paper usage analysis and all of the related costs. We aim not just at reducing paper consumption but eliminating it wherever possible and replacing it with optimised processes supported by digital tools to improve customer satisfaction and increase the efficiency of our employees and our operations.

NLB d.d. is currently the biggest paper consumer in our Group but has made a significant progress since 2019. The number of physical postal items has decreased for 39% in the last two years, and the number of customers without any digital channels has dropped to less than 1/3. Internal paper consumption has decreased by almost 30% with the introduction of a digital signature for all employees and process digitalization. We have the ambitious goal that by the year 2025, the Group will decrease the number of paper prints in its operations by 50% compared to the year 2019.

Electricity consumption

Electricity consumption decrease reflects home-office and in some cases improvements of energy performance (energy efficiency) of buildings of NLB operations, whereas we plan to not only continue but also intensify this trend.

NLB set itself a clear goal, that by 2030, 75% of all of electric energy used in the NLB Group will come from zero-carbon sources.
Responsible procurement

In the procurement process, NLB responsibly includes appropriate treatment of environmental, social, ethical, and economic issues at all stages of the procurement life cycle.

The following practices have been an integral part of our procurement process for years:

- Adoption of e-tools and paperless processes to minimise the ESG impact on the side of the Group.
- Working with suppliers with a goal to identify common areas such as: waste reduction, carbon emissions reduction, energy and water consumption, biodiversity protection, sustainable economic growth, and delivering economic benefits through procurement.

It is one of our strategic priorities to enhance the ESG aspects of our work in 2022, more specifically in relation to:

Procurement policy

ESG guidelines and standards in the policy will be expanded for the elements not yet included.

New RFPs

Due diligence questionnaires that we already use to assess all bidders’ compliance to our standards will be amended with additional questions for expanded ESG assessment. Additionally, standard terms and conditions that are in use when contracting the suppliers will be amended with additional ESG elements.

Existing suppliers

We will make an assessment of suppliers with whom we already have a business relationship and will thus actively influence on the appropriate sustainable orientation of existing suppliers. This activity will be concluded in two iterations by the end of 2023.

Annual supplier evaluation

The questionnaire for our annual supplier evaluation process will be updated to enable regular annual screening of and feedback to suppliers with the expanded list of ESG topics.

Reporting

The introduction of reports about bidders and suppliers with identified negative impact social and environmental impact, bidders and suppliers from whom improvement measures were requested, and bidders and suppliers with whom relationships were terminated because no improvements have been exhibited.
Sustainable finance

We use our core business to promote sustainable development in our markets, while managing the environmental and social risks associated with our financing activities.

Private individuals
The goals of the NLB Group Sustainability framework were followed with the implementation of documentation’s cloud signing within m-bank Klikin, which also helped to reduce the amount of paper documentation and proactively encourage the use of digital channels. The Bank has also been following the trend of decreasing paper statements for several years now. Also, the products themselves contribute to paperless banking operations, like NLB Package My World (‘Moj svet’) and NLB Package Digital. NLB Package My World (‘Moj svet’) is primarily created for young clients between 18 and 27 years, offering them also use of m-bank Klikin and e-bank NLB Klik. The NLB Digital Package can be opened 24/7 online through a video call in the Contact Centre. The sales of NLB Green Housing Loan with special benefits for financing the purchase or building of passive houses, introduced in 2020, continued in 2021 with the total of EUR 9 million. Successful campaign within #HelpFrame, where all customers up to 40 years borrowing any housing loan in campaign’s period participated in a draw, was repeated in 2021. In the campaign, up to 100 clients were reimbursed in three monthly instalments totalling a net amount of up to EUR 1,000. Following the ESG orientation of the Group, special financing for the purchase of solar panels, power storage, and heat pumps was agreed to be offered to clients of one of the Slovenian retailers, selling technical products.

In the support of philanthropy aid in Slovenia individuals and companies could pay donations with no fee from payment transactions to 30 humanitarian organisations.

The mobile branch BankGo visited many towns in Slovenia every month, ensuring the availability of banking services in remote areas of Slovenia. On average, the mobile branch is on the road five days a week, visiting at least three towns a day.

Micro and SMEs
The Bank focused on defining specific purposes for sustainable financing of legal entities, which will lead to development of two sustainable loans aimed to finance projects in which most of the Slovenian companies focus their sustainable efforts for green transition. The loans are planned to go on the market in first half of the year 2022 and will be focused on energy efficiency (standalone offers and with partners).

An important step in a customer’s journey is not just financing, so the Bank explores the best options to improve customers’ experience in gathering the required documentation and also in the cloud-based signing of the documentation within m-bank Klikpro (introduced in December 2021) and additional digital solutions development planned in 2022. The latest contributing both in reduction of paper documentation and proactively encouraging the use of digital channels. The Bank has also been following the trend of decreasing paper statements for several years now. The bank established a team of specialists for agricultural segment. An investment loan offer was extended to them with maturity up to 15 years and possibility of moratorium due to rising demand of agricultural companies for loans above 10 years and existing offer of those from competitors. This indirectly encourages local and ecological food production.

A cooperation agreement has been established with the University of Ljubljana, School of Economics and Business to help their students gain ESG knowledge and add it into their consideration frame, while developing new ideas for banking products. NLB presented six ESG product challenges to the students for private individuals and legal entities which will be the base for developing new ESG solutions in 2022.

The bank also took part in the project ‘Digital Volunteers Collaborative Group’ and successfully helped the Slovenian SME company to digitalize their operations.

Large corporates
In 2021, over EUR 60 million of EU Taxonomy-eligible long-term loans were approved by the Bank (the large corporates segment). The Bank financed investments in energy infrastructure, telecommunications network, water supply network, construction of cultural and school facilities, and energy efficiency. At the end of 2021, the Bank and the Group banking members set ambitious sustainable financing goals for the years 2022–2025. Based on the analysis, the focus will be on renewable energy sources, solutions for the carbon footprint reductions, improving energy efficiency, and supporting a circular economy.

In 2022, all employees in the large corporates segment will go through internal & external trainings on sustainable financing, which will enable us to better advise our clients on sustainable financing and help us to find optimal solutions together with them.
NLB Skladi
As part of the European Commission’s Action Plan on Sustainable Growth Financing in December 2019, the European Parliament and the European Commission adopted a Regulation on the sustainability related disclosures in the financial services sector (SFDR) (EU) 2019/2088. The purpose of the Regulation on disclosures is to increase transparency regarding sustainability characteristics and investments for end-users.

NLB Skladi supports this EU initiative and shall continue to strive to contribute to sustainable development. In 2021, NLB Skladi updated and newly adopted several acts, which took it a further step towards a sustainable society. Among other things, it updated the prospectus of umbrella fund NLB Skladi with management rules included, where it defined sustainability risks and defined sustainability aspects in investment decisions in accordance with the most current policies of regulators.

NLB Skladi also adopted a Shareholder participation policy and updated the General Meeting voting policy, adopted a new remuneration policy, which defined, among other things, the principle of equal pay for equal work or work of equal value for the employed men and women, and is thus gender neutral, and in particular, it not only explicitly included sustainability factors in the Policy itself, but also explicitly added a requirement that every person with a special nature of work must have such factors among their annual goals.

Finally, in 2021, NLB Skladi updated its product portfolio and offered its first green products, which take particular account of environmental sustainability aspects.

NLB Skladi pursues the concepts of sustainable development in investment decisions. Two subfunds of the NLB Skladi umbrella fund invest based on an additional emphasis on sustainability, namely:

- NLB Skladi subfund - Socially Responsible Equity Subfund invests in issuers with above average environmental (E) and social (S) awareness in their operations, provided that they respect good governance practices (G).
- The NLB Skladi - Green Equity Funds Subfund focuses on investing in issuers with above-average environmental (E) awareness, assuming that they respect adequate governance practices (G).

With the remaining 18 subfunds of the NLB Skladi umbrella fund and with individual portfolios managed by NLB Skladi, the sustainability aspects are explicitly included in a due diligence of equity investments, which NLB Skladi has been pursuing for almost a decade and is one of the pioneers in Slovenia.

ESG Risk management
The NLB Group integrates and manages ESG risks within the established risk management framework. ECB and EBA guidelines are followed, and are actively integrated into business strategies, risk management framework, and internal governance.

ESG risk management is addressed on three levels:

- **Transformational strategic level**
  Contributions to broad-based discussions of best practices regarding ESG risk management in key areas.

- **Transitional Portfolio level**
  Integrated monitoring of ESG risk exposure at portfolio level.

- **Transactional client & transactional level**
  Review and assess commitment, capacity and past performance in ESG risk management, preparation of proposals for possible improvements.

In 2021, the Environmental and Social Transaction Framework was prepared that applies to transactions with greatest potential for significant environmental and social impacts (it includes among others: exclusion list, regulatory compliance check). Special chapter addresses climate finance transactions. When approving climate finance transactions NLB Group will take into consideration clients and activities that can make a substantial contribution by:

- having a low impact on the environment and having the potential to replace high impact activities (e.g., renewable energy),
- reducing impact from other activities,
- making a positive environmental contribution.
Transaction review (ESG risk screening)

We started with the implementation of ESG factors in the underwriting process, whereby climate-related and environmental risks are considered at relevant stages of the credit-granting process and monitored on the portfolio level. In NLB Group, we strive to obtain relevant clients’ data as prerequisite for adequate decision making.

The availability of ESG data in the region where the Group operates is still lacking. Nevertheless, the Group strives to obtain relevant clients’ data as prerequisite for adequate decision making and corresponding proactive management of ESG risks.

</tr>
</tbody>
</table>
| Monitoring | Post transaction follow-up | • Changes in business activities (e.g. changes to products sold, raw materials, wastes emitted).

Climate-related and environmental risks were integrated in the client or transaction screening by performing following activities:

- ESG criteria implemented in credit rating renewal: in a process of credit rating renewal ESG screening of E&S high risk clients with exposure larger than 10m EUR is performed (from October 2021 onwards).
- ESG criteria implemented in project finance: in case of new project finance ESG screening of E&S high risk clients with exposure larger than 10m EUR is performed (from October 2021 onwards).

Besides addressing ESG risks in all relevant stages of the credit-granting process, relevant ESG criteria were also considered in the collateral evaluation process. On portfolio level, the Group does not face any large concentration towards specific NACE industrial sectors exposed to climate risk, whereby the role of transitional risk is more prevailing.

- Activities, that are excluded under all circumstances because they are illegal or severely restricted under national or international law.

A client’s business activity is the main driver of E&S risk associated with an investment. Environmental and Social Categorization Methodology Framework provides an index of business activities with corresponding environmental and social risk ratings.

- Client is meeting relevant laws, regulations and standards, including environmental and health and safety regulations, planning permissions, operating licences and permits.

- Changes in business activities (e.g. changes to products sold, raw materials, wastes emitted).
- Regulatory investigations, fines or penalties imposed on the clients.
- Accidents or incidents causing significant damage to the environment or human health and safety.
Prohibited activities
Environmental and social screening of current or potential financing applications against the MICA 2013 and EBRD 2014 Exclusion List and applicable environmental and social laws is implemented.

In April 2021, a special chapter of the Lending Policy addressing Environmental & Social Framework with three categories (prohibited, restricted, normal activities) was amended with restrictions on coal-related financing. NLB Group will not provide any new financing to thermal coal mining or coal-fired electricity generation capacity in any way, including eventual transitional enhancements.

Portfolio review
To provide employees of the NLB Group with a guide to a typical level of inherent environmental and social risk related to Category A Projects, and to particular business activities we developed the Methodology Environmental and Social Transaction Categorisation that ranks activities as:
• HIGH ACTIVITY RISK - The client’s business activities may give rise to significant or long-term environmental and social risks and impacts. These may require more specialised risk assessment, and the client may not have the technical or financial means to manage them.
• MEDIUM ACTIVITY RISK - The client’s business activities have limited environmental and social risks and impacts, and these are capable of being readily prevented or mitigated through technically and financially feasible measures.
• LOW ACTIVITY RISK - The client’s business activities have minor/few environmental and social risks and impacts associated with them.

On portfolio level the Group does not face any large concentration towards specific NACE industrial sectors exposed to climate risk, whereby the role of transitional risk is more prevailing.

Participation in ECB Climate Stress test exercise
As a systemically important institution, NLB Group was also included into 2022 ECB Climate Stress test exercise. Preparation activities for the purpose of this exercise, consisting of three modules, are already underway. By performing this exercise ECB intends to assess how banks are prepared for dealing with financial and economic shocks stemming from climate risk. The exercise will be conducted in the first half of 2022 after which the ECB will publish aggregate results in July 2022.

EU Green Taxonomy
The EU is committed to achieving ambitious climate and energy targets by 2030, in line with the UN 2030 Agenda, the Sustainable Development Goals (SDGs) and the Paris Agreement. The EU’s long-term strategy is to achieve net-zero Green House Gas (GHG) emissions by 2050.

One of the means to achieve the goals is the adoption of the EU Taxonomy Regulation, a classification system, establishing a list of environmentally sustainable economic activities for their contribution to six environmental objectives:
1. Climate change mitigation,
2. Climate change adaptation,
3. The sustainable use and protection of water and marine resources,
4. The transition to a circular economy,
5. Pollution prevention and control,
6. The protection and restoration of biodiversity and ecosystems.

An approach is to classify banks’ exposures by assigning NACE codes5 and comparing these with the Taxonomy-eligible NACE codes – the economic activity description which can be found in Annex I and Annex II of the Taxonomy Regulation.

Since the EU Taxonomy is still being developed and because data from corporates on taxonomy-aligned activities is limited, NLB Group is in the process of integrating taxonomy eligibility/alignment in its business strategy, target setting, product design and processes or in its engagement with clients and other stakeholders.

Mandatory disclosures
According to Delegated act6 Article 10, from 1 January 2022 until 31 December 2023, NLB Group will prepare a disclosure of:
1. the proportion of total assets of the exposures referred to in Article 7, paragraphs 1 and 2 – the exposures to central governments, central banks, and supranational issuers,
2. the proportion of total assets of the exposures referred to in Article 7(3) – exposures to undertakings that are not obliged to publish non-financial information pursuant to Article 19a or 29a of Directive 2013/34/EU,
3. the qualitative information referred to in Annex XI.

We will also disclose the proportion of our trading portfolio and on demand inter-bank loans in our total assets.

Our analysis shows that at the moment (March 2022) there is no publicly available data from NFRD companies in line with EU Taxonomy expectations. Therefore, mandatory EU Taxonomy disclosures will be provided by the NLB Group by the end of 2022.
Voluntary disclosures

Voluntary disclosures are not part of the mandatory disclosures under Article 8 of the Taxonomy Regulation and are therefore disclosed separately in this chapter.

Consequently, the presented data below do not illustrate NLB Group’s proportion of green assets because these require classification as taxonomy-aligned activities.

- **EU Taxonomy eligibility – NFRD companies**

  To determine the impact on climate adaptation and climate mitigation, a further deep dive review of NFRD companies was performed (clients that are subject to non-financial reporting with over 500 employees in EU and are not a financial institution).

  To determine the eligibility of our NFRD portfolio, we followed a sector approach (on the basis of NACE codes). An additional check was performed on the main activity of clients.

- **EU Taxonomy eligibility – Legal entities**

  To determine the scale and intensity of climate change and the environmental impact further assessment was performed on legal entities on-balance portfolio. To determine the eligibility of legal entities portfolio, we used a top-down approach on the basis of NACE codes. The above metrics are unaudited and have been prepared to the best of our ability.

  NLB Group focuses strongly on climate change and the environmental impact of our financial services. To determine impact on climate adaptation and climate mitigation further deep dive review of NFRD companies will be prepared.

Taking care of a fellow man.

Taking care of people means more than just providing them with what they need. It means recognising the inherent value and potential of all our employees, customers, neighbours and at times even those less fortunate. By enabling them with opportunities, we help them to be successful by their own merits while being authentically themselves. To us, it means we are building a society where its whole potential is never neglected, but always realised.
Contribution to the society

The Group contributes towards wider socio-economic development through its Corporate Social Responsibility (CSR) activities and is responsible to its clients, employees, and the social environment. We pay special attention to knowledge and lifelong learning.

Every year, we are striving to increase the share of CSR activities that pursue UN SDG. Our target for 2021 – at least 30% of all CSR activities in every bank member should be aligned with UN SDG – was achieved, even more, some member banks even exceeded it.

Humanitarian activities

A world full of heart is a world full of opportunities

Our world is much more beautiful and colourful when we stand by each other and compassionately create new opportunities. That is why we made donations in each of the markets where we operate that promote inclusion whether to children, the elderly, or both.

In Slovenia, NLB d.d. donated to two humanitarian organisations, Batrava and Humanitarček, which will enable 200 disadvantaged children the opportunity to develop their talent and provide 21,000 hot meals to elderly people living below the poverty line.

NLB Banka Beograd and Komercijalna Banka Beograd supported Centre for youth integration SOS Dečija selo, a non-governmental, humanitarian, and non-profit organisation that has been working to improve the quality of life of children and youth without parental care.

As it has been a tradition for the past years, NLB Banka Sarajevo supported the Home for Children without Parental Care Tuzla, whereas NLB Banka Banja Luka focused on both youth and the elderly by providing 500 children with disabilities and socially endangered families with New Year’s presents, and 500 seniors from elderly centres with Christmas lunch and bedding.

NLB Banka Podgorica’s donation supported Rights centre for children - a non-governmental organisation that is helping children towards stronger participation in the decision-making process and ensuring their voices are heard.

NLB Banka Priština also decided on double donation. The first went to the National Autism Association in Kosovo (ANAK), and the second donation was donated to the Ideas Partnership, an organisation that works mainly with Roma, Ashkali, and Egyptian communities in the field of education, health, social work, and the environment.

In addition, NLB Banka Skopje also decided to support both children and the elderly by donating to a daycare centre for the elderly in Skopje, and the Foundation for Educational and Cultural Initiatives Step by Step. Project “Be IN, Be Inclusive, Be Included,” that strives to improve the educational opportunities for children with disabilities and contributes to the development of an inclusive non-segregated primary education subsystem.

Promotion of entrepreneurship

Understanding small entrepreneurs’ challenges – #HelpFrame project continued in 2021

The Group’s socially responsible actions have been continuously upgraded with projects that follow the UN Sustainable Development Goals. The Group’s first such regional project was launched in spring 2020. The coronavirus crisis has closed the door to many dreams in the previous years. That is why we decided to give a glimmer of hope with the #HelpFrame project for another year in 2021. The project is our way to give a helping hand to local small entrepreneurs, who have been most affected by the situation in recent years.

As part of the campaign, we donated advertising space to 73 selected entrepreneurs in Slovenia, and 258 in whole NLB Group. Last year’s participants were invited to become ambassadors of this year’s project and to share their positive experiences in the #HelpFrame.

Care for environment

Expansion of Organic Farming

Komercijalna Banka, as a new member of the Group, joined NLB Banka Beograd for the first time in the organisation of the 10th anniversary of the Organic competition. Over the years both banks have been the absolute leaders in the payment of subsidised loans for farmers – both in number and amount and this why a record number of 83 received projects in the field of organic production and processing was an outstanding result. Most of them were from the field of fruit-growing, but there were also very interesting projects related to the production of natural cosmetics, as well as renewable production without waste. It was with great pleasure to witness the expansion of organic farming and processing and award top 10 projects with a total of more than 40,000 EUR.

Planting trees, reducing paper, & recycling

NLB Group is focused on digitalization of services that also affect the reduction of paper usage and environmental
Inclusiveness and integrity
Helping young families with housing issues
Last year, Komercijalna Banka and NLB Banka Beograd joined NLB d.d. campaign of paying off housing loans, during which we rewarded 300 young people in Serbia and 100 in Slovenia who realised housing loans with a few free monthly instalments. This action is also part of a broader regional initiative of the Group, which aims to support young people to solve the housing issue and motivate them to continue building their lives in our region. This action is based on the idea that young people are a pillar of the sustainable future of our region, and that is why it is important to support their decision to continue living and create positive changes at this point on the map, which is home to all of us. By investing in their future, we are making a big investment in a better future for each of us.

Inclusion of vulnerable groups with the help of digitalization.
NLB Skopje was the first bank in the country that made significant improvements to the functionality of its NLB mKlik application, making the app available for use by the visually impaired people. The application is adapted to be readable for the “built-in voice reader” functionality by being installed on the user’s mobile phone. In this way, the visually impaired clients can have uninterrupted access to all their accounts, to perform all banking transactions, to update their data, to apply for mobile credit – simply and digitally thanks to the voice guide. This functionality, which is unique on the market, contributes to raising the quality of life of the visually impaired, enabling independent use of banking services at any time and any place.

Support for professional and youth sports
Enabling youngsters to spend quality time with peers
This year, the support of Youth Sports was carried out in three banks. Besides NLB d.d., also NLB Banka Skopje, and NLB Banka Sarajevo. NLB supported 42 sports clubs throughout Slovenia for the sixth consecutive year. We continue to pursue the development of youngsters in sports clubs and gave them the opportunity to spend quality free time with their peers. We supported children in sports clubs involved in disciplines that we also support on a professional level: skiing, handball, football, and table tennis.

Additionally, NLB Podgorica continued to support the best sports results by cooperating with their most trophy-winning basketball club, a participant in the Aba League and Euro cup.
Protection of cultural heritage

Bankarium, the Slovenian Banking Museum
Saturday, 19 June 2021 was a special day for NLB and for Slovenia. On this day, NLB handed over Bankarium, the Banking Museum of Slovenia to the public. It is the first and only banking museum in the country and NLB founded it because, as our CEO, Blaž Brodnjak puts it "our tradition based on people, banking knowledge, and culture reach way back, more than 200 years old when the first banking institution – Carniola Savings Bank was established in 1820".

The decision was adopted following the Sustainable Development Goal number 11 (Make cities and human settlements inclusive, safe, resilient, and sustainable) with the target to strengthen efforts to protect and safeguard the world’s cultural and natural heritage.

Visitors first walk into a 5,000-year-old history of world banking in a multimedia introduction. Then, they explore the 200-year-old banking heritage in the Slovenian territory. They can see all the currencies that were valid here during this period and check their purchasing power. Three different economic systems and major banking institutions are explained, as well as key personalities of Slovene banking system. Among the bank practices, many will be attracted by bank counters from different periods, a rich collection of piggy banks, and even the interior of an ATM. Visitors will also be able to enter the bank vault, and in the end they can immerse themselves in the 3D VR application of modern mobile banking experiences.

Increasing financial literacy

Bankarium, the banking museum of Slovenia, is not just a museum – it is also a financial literacy centre. Walking through six stages of personal finance management, visitors can play digital games and quizzes, and learn or check their financial literacy in a playful way. We are very excited to see that the centre is widely accepted and enjoyed by school groups, with which we have great influence in knowledge transfer to future generations.

In 2021, NLB Podgorica also supported the spread of financial literacy and expanded their role in society. They organised training courses to educate younger elementary school students about the importance of saving and having a healthy attitude towards money.
Our people

Care for employees

The Group is continuously strengthening its HR practices based on feedback from reputable institutions and benchmarks with best-in-class HR practices. NLB d.d. was recognised as a ‘Top Employer’ by the Dutch Top Employer Institute for already the 7th consecutive year, demonstrating a high level of expertise and contribution in all relevant HR areas. Through this achievement, we are continuing to ensure an even more stimulating work environment throughout the Group in the future.

Health and safety

The Occupational Health and safety management system in NLB has been implemented and follows all legal requirements based on occupational health and safety regulations.

In accordance with the legislation on health and safety at work and our internal Safety Statement, risk assessment is carried out according to a set methodology and on-site inspection of workplaces. Regular trainings in safety and health at work are provided to our employees alongside with appropriate personal protective equipment and its periodic inspection (where necessary). NLB keeps records of injuries at work, which include research of every injury and the adoption of measures to reduce the occurrence of injuries.

In addition to the technical risk assessment, a health risk assessment is also performed. Through joint measures, we provide employees the safest and healthiest jobs possible.

All employees are obliged to:
- inform their immediate supervisor of any deficiencies and irregularities in their workplaces and in the work environment that could endanger their safety and health.
- if an immediate danger to the safety and health of the employee is identified, the employee must stop working. The employee must inform his/her superior, who must take care to eliminate the danger.
- the employee does not return to such a position until the danger has been eliminated.
- all employees are duly informed about possible hazards on their workplaces and acquainted with procedures in case of eventual hazardous event.
- employees are provided with regular training (first aid, firefighting, evacuation) and regular preventative medical examinations.
- please note, that in 2021 there was zero fatalities or high-consequences work-related injuries. We recorded 10 minor injuries, which consist of fall and slip. During our regular workplace risk assessment, we did not identify any high-risk workplaces.
- throughout the year, we offered employees numerous trainings for health protection. In addition to measures mentioned above, short guidelines on healthy habits were regularly published on the NLB internal website.

Development of employees

The pandemic situation has changed the way we learn and train. We now provide majority of our trainings online. In 2021, we introduced and enabled access to Udemy for Business to half of the employees and with it access to more than 7,000+ online courses from many different subject areas. Besides excessive investment in trainings in areas of Banking & Finance and Sales and Compliance, we put a strong focus on Leadership and Personal development trainings, especially how to tackle the challenges of remote work. We also paid special attention to skills and initiatives that will shape our future and therefore trained our employees in areas of:
- Data management,
- IT development and operations skills, and
- Sustainability.

We are also actively working on the development of so-called “Social Learning,” which includes forms of learning in the workplace such as mentoring, coaching, rotation between different organisational units and peer coaching. Employee development includes planning and training for skills and competencies development.

The purpose of development activities is to train employees to achieve business goals and thus meet their personal expectations, and at the same time act socially responsible to all stakeholders. Through targeted learning and training, the NLB Group systematically changes its organisational culture, helps to develop new business practices, and strengthens the NLB brand. In 2021, an employee in the NLB Group on average spent 20.4 hours on training. A total of 54,441 attendees took part in 1,463 training programmes.

Development of leadership skills
Employees at different levels of management are involved in the development of their leadership skills, and we pay special attention to those who are in the position of a leader for the first time. The development of leadership skills is designed modularly, where the contents are meaningfully upgraded, and during the implementation of individual modules a certain period elapses in which the theory is transferred into practice. We pay attention to the developmental needs of individuals through mentoring, coaching, peer coaching, and rotation.

Development of leadership competencies.
With all Board Members and B-1.
To define activities for developing certain set of behaviours.
Talent development

In NLB Group, we have put special emphasis on leading the growth and development of our high potentials. We have implemented a common Talent management strategy and process and with the input of managers identified high potentials – leadership, professional, young talents, and successors for managerial positions. To support their growth, we are providing them with additional opportunities, knowledge and skills needed to manage and lead challenges of the future.

Attracting talent

Aiming to attract top talent throughout the region we have started to actively develop our Employer brand in line with the corporate strategy and development. We have reviewed and analysed existing practices and impressions from the internal and external public, performed an internal and external survey, interviews, and multiple focus groups to identify the relevant employer value proposition. This will help us improve relevant areas and bring us closer to current and future employees.

To strengthen the perception of NLB Group as the digital transformation leader in the region and to attract top talent into our ranks, we have also organised two very successful NLB Hackathons (Topics: Data Science and Open Finance).

Developing organisational culture

Organisational culture is an important driving force of company development and employee well-being. Measurement of organisational culture has given us the roadmap to grow and further enhance constructive organisational styles. Involving employees from all backgrounds, areas and levels in focus groups has given us in-depth insights on the actions that need to be taken next to ensure even higher engagement and success.

Promoting local and international career development

By systematically focusing on talents and other key employees, we try to enable them career development they want to pursue, and at the same time encourage them to gain experience and develop their careers in other banks of the NLB Group. In addition to long-term transfers, we also support the short-term transfer of knowledge and rotation in the Group. To enable these transfers, we adopted internal Policy of Mobility within NLB Group that will be implemented in entire NLB Group in first half of the year 2022.

Top Employer

by the Dutch Top Employer Institute for already the 7th consecutive year.
Remuneration system

For an employee working in the companies within the Group, salary is composed of:

Fixed part
Determined according to the complexity of the work for which the employee has concluded a contract of employment.

Variable part
Depends on the employee’s performance for reaching set goals.

Performance assessment is done by the head of the employee’s organisational unit using a top-down approach to evaluate the employee’s achievements in relation to goals set for a particular assessment period (quarter or half-year). The goals are set according to the ‘SMART’ method, meaning that they must be specific, measurable, achievable, relevant, and time bound.

Regulatory changes
In the area of employee’s remuneration, some legal changes were introduced in 2021, namely amendments to the Banking Act (ZBan-3) and the Companies Act (ZGD-1), which stipulated, among other things, that the Remuneration Policy of members of the Supervisory Board of NLB d.d. and members of the Management Board of NLB d.d. should be submitted for voting to the General Meeting of Shareholders. Thus, in December 2021, the Remuneration Policy was submitted to the General Meeting of Shareholders for a vote.

Remuneration policy for members of the Supervisory Board of NLB d.d.
Members of the Supervisory Board may, in relation to their function of a member of the Supervisory Board, only receive remuneration that is compliant with the relevant resolutions of the Bank’s General Meeting.

The Supervisory Board members are entitled to a remuneration for performing their function and/or attendance fees for their membership in the Supervisory Board of the Bank and the committees of the Supervisory Board of the Bank, and to reimbursement of other relevant expenses and costs.

and member of the Management Board of NLB d.d.
Members of the Management Board receive remuneration consisting of a fixed part of the salary and a variable part of the salary. The amount of the variable part of the salary of a member of the Management Board depends on the achievement of the financial goals of the NLB Group, achieving financial goals in the areas within the competence of this member of the Management Board and personal goals. So, the objectives defined are intended to achieve long-term value creation and sustainable results and combine financial objectives with environmental, social and management objectives.

Remuneration policy for employees in NLB d.d. and in NLB Group
In 2021, a new Remuneration Policy for employees in NLB d.d. and in the NLB Group was adopted, where the basic principles represent the framework for rewarding employees in NLB d.d. and the NLB Group and has also been implemented in all members of the NLB Group. The remuneration policy defines fixed and variable remuneration, the goal-setting system and performance criteria (KPIs) and sets out the conditions for the allocation and payment of the variable part of remuneration.

Pay-out of a variable part of salary in 2021
Given the situation caused by the coronavirus pandemic and due to restrictions imposed by the Bank of Slovenia in 2020, the Bank was not able to take any decision on the allocation and payment of variable remuneration of employees performing special work until April 2021. After expiration of the restrictions the bank was able to pay out the non-deferred part of variable remuneration for 2019 (monetary part) and the deferred part of the variable remuneration for 2016 and 2017 according to the Remuneration Policy.

In line with the expectations regarding the financial results of the NLB Group for 2020, considering the circumstances related to the COVID-19 epidemic, the letter from the President of the ECB Supervisory Board and the amount of accrued funds for remuneration, the Bank assessed risk based on KPI’s and KRI’s objectives and remuneration policy criteria.

Accordingly, the Bank decided to make a preliminary adjustment of the variable part of the salary to employees performing special work for the financial year 2020 and reduced the corresponding variable part of remuneration of an employee performing special work.
Employment, diversity, and equal opportunity

Number of employees

The Group continued with optimisation of processes and rightsizing its staffing level. Due to the acquisition of Komercijalna Banka, Beograd and its subsidiaries in December 2020, the number of employees at the 2020 YE rose to 8,792, but has downsized throughout the year to reach 8,185 at the 2021 YE.

Diversity

The policy on the provision of diversity of the management body and senior management sets the framework in the area of diversity and representation of both genders in the management and supervision bodies (Supervisory Board and Management Board) and the senior management, and lays down the process of the selection and appointment of candidates, which enables the management body to be composed in such manner that, as a whole, it possesses suitable knowledge, skills, and experience needed for in-depth understanding of the strategy and challenges of the Bank, and the risks to which the latter is exposed. With this Policy, the Bank also sets the framework for diversity regarding education, the range of knowledge, skills and experience, age, gender, and international experience.

Total number and rate of new employee hires during the reporting period, by age group, gender and region.

NLB d.d.: In total 135 of new employees in 2021. 38 (28%) were younger than 30 years, 94 (70%) were between 30 and 50, 3 (2%) employees were older than 50.

129 (95.6%) were employed from Republic of Slovenia.

NLB Group: In total 361 of new employees in 2021. 108 (30%) were younger than 30 years, 240 (66.5%) were between 30 and 50, 13 (3.5%) employees were older than 50.

98% of new hires are coming from local community; 38.5% men and 61.5% women.

Total number and rate of employee turnover during the reporting period, by age group, gender, and region.

NLB: In total, 216 employees departed from NLB d.d. in 2021. Fifteen (7%) were younger than 30, 59 (27%) were in the age between 30 and 50 and 142 (66%) employees were older than 50 years old.

In total, 693 employees departed from NLB Group significant members in 2021. 66 (9.5%) were younger than 30, 302 (43.6%) were in the age between 30 and 50 and 325 (46.9%) employees were older than 50 years old. Thirty per cent were men and 70% were women.

Benefits provided to full-time employees that are not provided to temporary or part-time employees

Promote and protect the rights, obligations and responsibilities arising from the employment relationship are regulated by laws, collective agreements, and internal regulations. All employees have rights as they are determined by law, collective agreements, and internal regulations.

Total number of employees that took parental leave

NLB Group: 354 employees (320 women, 34 men)

Some of the employees started parental leave in 2021 and are still using it, they shall return to work in 2022. In general, all employees returned to work after parental leave ended.

Total number of employees that returned to work in the reporting period after parental leave ended, by gender.

During the reporting period after parental leave ended, 320 women and 34 men returned to work.
Minimum notice periods regarding operational changes

The way of cooperation with the Labour unions and the Worker’s council is fixed by collective agreements, the Act of workers and management and the Agreement on cooperation between Worker’s council and employer. Deadlines for informing the Unions and the Worker’s council range from 8 to 30 days. In NLB Bank Banja Luka, organisational changes are communicated before adoption, minimum notice period is not defined.

In Serbia the way of cooperation between the Bank and the Bank’s trade unions is governed by the Collective Agreement of the Bank. The union has the right to be notified of issues of importance for the position of employees in accordance with the Law on Labour and other regulations, whereby information is delivered at the request of the Union within 15 days from the date of submission of the application, at least six months and at the end of the business year. The Bank is obliged to review in a timely manner the opinions, requirements, and proposals of the Trade Union Board, which are relevant to the economic and labour-social position of employees and to, as a rule, inform the Union Board in writing about the reasons for not accepting the given opinions, requests and proposals, no later than eight days after the date of receipt. The union is obliged to consider all proposals submitted by the Bank within eight days, and to inform the Bank in writing about the occupied positions.

Average hours of training that the organisation’s employees have undertaken during the reporting period.

20.4 hours per employee in the 2021

Type and scope of programmes implemented, and assistance provided to upgrade employee skills.

Internal education (lectures and workshops), e-trainings, external training courses, courses for new employees

Every 3-months HR publishes the list of all instructor-led training programmes for the next period. We also offer constant access to internal e-learning programmes and to Udemy for Business. External programmes are also defined at the beginning of each year in coordination with the business functions, focusing on new trends and needs of the employees through attendance on conferences, summits, trainings, round tables, panels, and lectures

Transition assistance programmes provided to facilitate continued employability and the management of career endings resulting from retirement or termination of employment.

Continuous on-job trainings, internal rotations, internal and external education activities provided to facilitate continued employability

Share of total employees by gender and by employee category who received a regular performance and career development review during the reporting period.

NLB Group: 98% (2% lack is due to Maternity leave, long-term absence, or new employees who weren’t present sufficient time of the period to be graded).

The goal of the organisation is that all employees receive a regular performance and career development review.

As organisation’s governance bodies we consider NLB Management Boards and NLB Supervisory Boards

31 members were older than 50, 31 were between 30 and 50 at the end of 2021.

The definition used for significant locations of operations

The total number of incidents of discrimination during the reporting period.

NLB d.d. and significant NLB Group Members

3

NLB has a policy of zero tolerance to any form of discrimination and violence. For two incidents no grounds established in the review process and are no longer subject to action. In the third case, the perpetrator was subject to measures under law on labour relations.
Respecting human rights through NLB Group standards of compliance, ethics, and integrity

In the NLB Group, we expect that all employees, as well as external business partners of NLB d.d. and members of the NLB Group respect human rights, employees’ rights, as well as general standards of conduct defined in the NLB Group’s Code of Conduct. It defines the values, sets standards and basic rules of ethical business conduct, which the NLB Group respects, promotes, and expects, and applies to all employees, regardless of the workplace or location of work. All employees also receive compulsory training in the field of standards of the Conduct. The effectiveness of the NLB Group Code of Conduct is also part of the regular self-assessment in the field of corporate integrity, an element of which is also the assessment of ethical culture, the effectiveness of the system of prevention of harmful conduct or reports of suspected violations, the tone from the top, the commitment of the bank’s management to corporate integrity, etc.

Our values and beliefs support our long-term goal of continuously improving the culture of our daily operations in the countries where the NLB Group is present. In the NLB Group, every employee, regardless of job or location, is required, as well as every other stakeholder in the NLB Group, to live in accordance with the highest standards of integrity in everything they do. The key to achieving these standards of conduct is also the strong culture of business compliance, which the NLB Group implements in practice by the obligatory conduct of all employees in accordance with its policies, rules, and other internal acts and in accordance with all relevant legislation and regulations in legal environments where the NLB Group operates.

Through the performed regular activities of monitoring the adequacy of the implementation of management standards, we estimate that, given the size of the NLB Group, the implementation of management standards in the NLB Group is appropriate.

Please note that there have been no confirmed violations of fundamental human rights vis-à-vis employees and customers, or by external contractors and suppliers and other contractual partners.

Risks perceived in connection with violations of standards of conduct:
- the risk of breaches of standards of conduct in relation to employees.
- the risk of breaches of standards of conduct in relation to customers.
- the risk of breaches of standards of conduct due to non-compliance with fundamental human rights by contractors, outsourcees, suppliers, and subcontractors.
- the risk of non-compliance of operations in fulfilling the legal obligations of external contractors, suppliers, and subcontractors.
- the risk of breaches of information security and personal data protection in meeting the legal obligations of external contractors, suppliers, and subcontractors.

Measures to manage the identified risks:
- Policies and procedures in place and internal control mechanisms to prevent harmful practices of all kinds (including breaches of standards of conduct).
- Regular training of employees and training of target groups in the field of standards of conduct.
- Carry out due diligence and take appropriate risk management measures for external contractors and suppliers.
- Carry out due diligence and take appropriate risk management measures against other contractual partners.
- Ensuring specific terms in written agreements and/or general terms and conditions with third parties which are vendors define minimum expectations of performance with respect to human rights as a requirement for investment.
- Ensuring the availability of channels for (anonymous) reporting of suspected harmful practices (including internally accessible (NLB Net) and publicly accessible Whistler application (at: whistler.nlb.si)).
- Implementation of procedures and mechanism for dealing with suspicions of harmful conduct and taking corrective measures and implementation of measures to protect notifiers (internal and external).
Harassment and Mobbing

The prevention of harassment and mobbing at work is a priority for the Bank. To ensure that no worker is exposed to maltreatment and sexual or other harassment by anybody implementing the tasks for NLB d.d., the latter has established a system for preventing all forms of mobbing. In the previous year, the system of mobbing prevention was revised. A special commission for the renewal of anti-mobbing mechanisms in NLB d.d., composed of the representatives of the Bank, the NLB Workers’ Council, and the NLB Trade Union, revised the Policy for Prevention of Harassment and Mobbing of Employees in NLB d.d., the Rules on the Prevention of Harassment and Mobbing at Work in NLB d.d., and the Instructions for the Business Process Prevention of Harassment and Mobbing at Work. By using these documents and the established procedures, the Bank also determines prohibited actions on a case-by-case basis and defines the procedure for their treatment and sanctioning of prohibited conduct.

Measures against mobbing and measures for improvement of organisational culture to protect human rights of employees

Zero tolerance and prohibition of any form of mobbing, as well as practical examples and guidelines for the employees who have already been included in the NLB Group Code of Conduct and in Policy of preventing mobbing as ensuring the dignity of employees and providing working environment in which no worker is exposed to maltreatment and sexual or other harassment by anybody implementing the tasks for NLB d.d.

With the purpose to ensure the dignity of employees and to provide a working environment in which no worker is exposed to maltreatment and sexual or other harassment by anybody performing tasks for NLB d.d., the latter has established a system for preventing all forms of mobbing. In the previous year, the system of mobbing prevention was revised. A special commission for the renewal of anti-mobbing mechanisms in NLB d.d., composed of the representatives of the Bank, the NLB Workers’ Council, and the NLB Trade Union, revised the Policy for Prevention of Harassment and Mobbing of Employees in NLB d.d., the Rules on the Prevention of Harassment and Mobbing at Work in NLB d.d., and the Instructions for the Business Process Prevention of Harassment and Mobbing at Work. By using these documents and the established procedures, the Bank also determines prohibited actions on a case-by-case basis and defines the procedure for their treatment and sanctioning of prohibited conduct.

For this purpose, the Bank has appointed the officer for the prevention of harassment and mobbing at work and established the Joint Committee for the Prevention of Harassment and Mobbing, consisting of the representative of the Bank, the Workers’ Council, and the representative trade unions.

Also, at the NLB Group level, equal opportunities, justice, and promoting culture focused on performance are respected. The HR policies and practices are based on culture promoting equal opportunities and performance of employees. Discrimination is prohibited in the HR management practice. The relationship between employees and the management is founded on trust, support, and constant feedback. In cases of disagreement, the conflict resolution procedure is defined.

All employees receive compulsory ethics and integrity training covering standards of conduct. Additionally, employees participate in the Workers’ Council and the Trade Union with which the Bank regularly cooperates at formal meetings and through consultations. The organisational climate/employment engagement and organisational culture are of key importance and, therefore, regular measurements are carried out and also an action plan for improvements is prepared. In most cases, personnel practices of the Bank are above legislative minimum because the goal of the Bank is to ensure that employees are highly motivated and included in the Bank’s operations. In addition to a penalty in the case of non-fulfilment of legislative requirements, the employees are the key to success. This is the reason why the Bank regularly monitors the engagement of employees and the organisational culture, and regularly checks the personnel practice.

Respect for human rights as regards products and services for clients

The aim of the NLB Group is to focus banking business on the prevention of human rights abuse by introducing business procedures that specifically define how this is done. All NLB Group members respect human rights.

The provision of financial services is, inter alia, linked to human rights issues and the efforts to make a positive contribution to exercising of human rights—as a financial intermediary for economic activities in general and by offering investment opportunities that contribute to sustainable development (microfinance). NLB Group observes and guarantees the respect for human rights in banking operations through comprehensive business processes and methodologies for risk assessment.

The clients are informed of all the products and services of the Bank in a transparent manner in accordance with the applicable regulations and decisions. The Bank does not offer products and services that could have negative impacts on human rights, which is ensured by regular monitoring processes for all products and services that are offered by NLB Group. The transparency of products and services and employee behaviour is in line with the NLB Group Code of Conduct. The employees in banks possessing better knowledge of products and services of the Bank, better manage and advise clients before selling products. This increases customer satisfaction and reliability. Members of the NLB Group manage risks in accordance with the instructions and comply with the requirements of NLB d.d. The training of employees in certain professional fields and in the field of information security is provided. The NLB Group Code of Conduct is compiled with based on zero tolerance approach for any human rights breaches. The systematic growth of the sales culture is ensured through education, planning, and upgrading of sales communications and management.

One key performance indicator is determining the needs of customers for a particular product and service, which is very important for ensuring customer satisfaction and meeting their needs. The second key non-financial performance indicator is to ensure continuous attention in dealing with clients and to check if they operate under jurisdiction characterised by political instability, weak governance, the suppression of minority groups, when the Bank is considering financing business activities in a conflict (war) zone, the development of financial products for vulnerable segments of clients, or when doing business with the corporate sector where the respect for human rights is known to be a problem.
Protection of the privacy of the clients and employees

Protecting the privacy of customers and employees, as well as third parties, is one of the key rules of admissible conduct set out in the NLB Group Code of Conduct. The Bank ensures the confidentiality of data both in the case of its own data processing and in the case of data processing by contractual processors. One of the goals is to ensure the legality of operations and the reputation of NLB d.d. and the members of the NLB Group also follow this approach. For the purpose of following the rules, all employees receive compulsory training in the field of personal data protection and information protection.

The NLB Group Code of Conduct, and in more detail the NLB Corporate Security Policy, defines the basic goals and principles of protection of people, facilities (business premises), information, and property of both the bank and its customers. One of the key or fundamental goals of corporate security is to ensure the protection of data and information of our customers and employees and thus ensure their privacy. In addition, the privacy of customers and employees is protected by compliance with regulations in the field of personal data protection and the implementation of internal rules and procedures in this area. By implementing the measures and upgrading the existing measures, the Bank ensures the confidentiality of data both in the case of its own data processing and in the case of data processing by contractual processors. One of the goals is to ensure the legality of operations and the reputation of NLB d.d. Members of the NLB Group also follow this approach.

Risks:
- the risk of possible unauthorised access to customer or employee data,
- the risk of data being disclosed to unauthorised persons, and
- the risk of incompetence or inappropriate behaviour of employees.

The privacy of NLB d.d. clients, as well as customers of individual members of the NLB Group, taking into account the new EU rules in the field of personal data protection, implemented in 2018 (the so-called ‘GDPR regulation’) is implemented by the company through implemented measures, for example:
- the need-to-know principle, which means that the employee has the authority or right to access only those data and information that he needs to perform his regular work duties.
- regular verification/verification of the adequacy of the allocated rights to access data.
- regular education and awareness of employees on the importance of data and information protection and ethical conduct.
- established privacy zones in the bank’s branches.
- identifying possible breaches of data protection by employees.
- carrying out security checks on application support and the computer network in order to identify potential vulnerabilities that could jeopardise the confidentiality of data and information.

Please note, that no serious breaches of personal data protection have been confirmed in relation to employees and customers, or by external contractors and suppliers and other contractual partners.
We care about everything we do. We know that trust is the most important currency; it is a foundation of our business success and fundamental to realising our mission. So, wherever we operate, we closely monitor that our standards and strategic priorities help improve the public’s faith and confidence in our vision.
Fighting against corruption and bribery

Awareness of the importance of the fight against corruption and bribery was emphasized by the NLB Group in the NLB Group Code of Conduct, which prescribes that the NLB Group has zero tolerance for such harmful practices. NLB Group must reject all forms of bribery and corruption. These forms of actions are unfair, illegal, and detrimental to countries with corrupt practices and society in general. The same, as in NLB d.d. and the NLB Group, is also expected from our customers, business partners and third parties. All employees of the NLB Group are therefore subject to restrictions on the acceptance and giving of gifts, expressions of hospitality and other influences on the conduct of employees in the NLB Group. Concrete measures are also prescribed to manage the risks associated with this. These are regulated in the Policy on the Prevention of Corruption and Bribery and on the Management of Conflicts of Interest.

In accordance with the Management and Supervision Policy of the NLB Group, the Standards in the field of Business Compliance and Strengthening Integrity also include obligations for members of the NLB Group to adopt all internal acts of the NLB d.d. in the field of prevention of corruption and conflicts of interest and to implement their obligations.

There was one confirmed incident of corruption in 2021, when contracts with business partners were terminated or not renewed due to violations related to corruption. Trainings in the field of prevention of corruption and bribery of employees were conducted within the set of trainings in the field of standards of conduct and ensuring integrity.

At the level of the NLB Group, the Policy on Prevention of Corruption and Bribery and on Management of Conflicts of Interest was already renewed in 2020: the system of risk management of corruption and bribery was supplemented with additional risk indicators (red flags), and following international standards in the field against corruption system of rules for the prevention of corruption and bribery and the management of related risks related to the engagement of agents and intermediaries, employment or hiring of services of (former) civil servants, contacts with high (state) representatives, prevention of nepotism, prevention of accelerated payments, and ensuring transparency in NLB operations Groups.

Combined with awareness-raising, established control mechanisms and training in this area, this was a significant progress in the implementation of activities in this area in 2020. Implementation activities continued in 2021. NLB Group also enlarged the scope of awareness-raising, established control mechanisms and training in this area to small non-strategic members of NLB Group, a lot of effort was put into awareness of the importance of the fight against corruption and bribery also in this small companies.

Based on the Enterprise Compliance and integrity Risk Assessment (ECRA) performed at the Group level, the NLB Group did not detect any significant new risks in the field of the fight against corruption and bribery in 2021 as a part of the one already detected in previous assessments. A specific questionnaire (World Economic Forum model: Good Practice Guidelines on Conducting Third-Party Due Diligence, Partnering against Corruption Initiative – PACI) is used for this purpose. Nevertheless, the compliance functions carried out awareness-raising activities and a risk culture in connection with this area, the approach to managing these risks in day-to-day operations has also been strengthened, for example by implementing an assessment of these risks in relations with suppliers. Due to its regional presence, the NLB Group is exposed to the risks of corruption in South-Eastern Europe.

As part of the fight against corruption and bribery, the NLB Group carries out several activities to manage these risks:

- Ensuring specific terms in written agreements and/or general terms and conditions with third parties define anticorruption and anti-bribery standards as a minimum requirement for investment.
- Internal control mechanisms, including accounting controls, are in place for anti-bribery and anticorruption area.
- Regular at minimum annual review, identification, and assessment of risks of conflicts of interest and corruption in the case of external contractors and suppliers and other contractual partners of NLB d.d. and the NLB Group through due diligence processes.
- For the purpose of appropriate identification of such events, various (whistleblowing) channels are established for reporting of suspicions of harmful conduct (internally and publicly available). Procedures and mechanisms are in place to address suspicions of harmful conduct and to take corrective action in the event of a suspicion of corrupt conduct.
- NLB d.d. and the NLB Group have implemented the envisaged measures for the protection of applicants (internal and external) and the manner of who orders them and in what way and with what the protection of the applicant is ensured.
- In 2021, regular annual trainings were conducted for all employees and management of NLB d.d. and members of the NLB Group in the field of corruption and conflicts of interest.
Improving customer satisfaction

Handling complaints

NLB d.d., has in compliance with legislation governing banking and financial services, two-level internal complaint process and two selected out-of-court settlement centres. NLB guarantees to customers complete information on the internal complaint process and the out-of-court settlement of customer claims (IRPS), which contains all necessary clarifications about the complaint-solving methods and procedures.

NLB employees respect the customer’s view of issues regarding contractual obligations and processing of our services and complaints are treated as a chance for improvement. A customer’s opinion/complaint is respected and registered by NLB d.d. whether positive or negative. Targets followed by NLB d.d. in the process of complaint management are fast, efficient, and professional complaint settlement on all levels of the process, settlement of satisfactory reimbursement requests in a unified way, registration of complaints such as to enable content analysis with the purpose of improving products, processes, customer experience (transparency, quality, customer relation, etc.) and the formation of proposals on improvements with the purpose of preventing a larger number of similar mistakes and consequences of the negative customer experience.

To improve the customer experience in dealing with complaints, we started measuring:

1. customer experience in dealing with her complaint (after we solve the complaint the customer is invited to fill in the survey),
2. the average time of dealing with the complaints (our goal is to reduce the time taken to solve a complaint).

Within NLB Group, the processing of complaints follows the same targets as NLB d.d. Accordingly, “Minimum Standards for the Sales Area” also comprise minimal standards for complaint management within banks of the NLB Group, which are:

1. written Instructions for the resolution of customer complaints,
2. two-level internal complaint process (centralized unit, which is responsible for substantive management of the resolution of customer complaints in the member and which is the substantive manager of the instructions for the resolution of customer complaints and acts as the second-instance complaints body),

3. recording of received and solved complaints and the preparation of annual report of customers complaints. Minimal standards are implemented in all banks of the NLB Group.

Experience shows that customers of banks, members of the NLB Group address their complaints also to NLB d.d. Ljubljana. Consequently, there is a clear process of how to treat such complaints. Customer will be informed that NLB d.d. isn’t in position to process his/her complaint since it refers to the business relation between the customer and a bank from the NLB Group, which is an independent legal entity. The customer will be at the same time informed that his/her complaint has been redirected to the bank within NLB Group and that he/she can expect the feedback from this bank. After having redirected the complaint, we ask the particular bank within NLB Group to inform us on the outcome of complaint, which enables us to follow the processing of such complaints also in practice.

Net promoter score

One of the key measures for evaluating the NLB’s position on the market is NPS (Net Promoter Score). It is measured on scale from -100 to 100 as willingness to recommend the company. For the third consecutive year, NLB has been experiencing the rise of the NPS and reached a positive value in June 2021. Highest NPS was measured in the segment of young clients.

Indicator is influenced by the various activities performed by the NLB, but mostly with the offer, attitude towards clients and perception of NLB in general. One of the best-rated traits of NLB is image of being important for the economic stability which indicates our responsibility for the community in which we operate. Clients also recognise our efforts of digitalisation as a provider of high-quality digital services.
Tax transparency

The NLB conducts its tax operations in line with the purpose and the requirements of the relevant legislation and in accordance with the international standards (e.g., OECD guidelines).

The NLB’s attitude towards the Financial Administration is respectful, transparent, and professional.

When determining the tax obligations, the NLB complies with the legally permitted reliefs and exemptions from the tax base. The NLB cooperates with the Financial Administration for obtaining the relevant explanations and information for the provision of tax bases on a regular basis or wherever possible.

When establishing the tax positions, the NLB strives to achieve certainty and implements a conservative policy of assuming tax risks. We optimise taxes only on legally permitted ways.

The NLB does not use the structures for the purpose of tax avoidance or aggressive tax planning. The NLB does not use the structures that are not in line with the purpose of the legislation or the use of which would subordinate its business motives to tax motives.

The NLB strives to ensure that the appropriate part of its taxable profit is taken into account in those members of the NLB Group where the value is generated. As a rule, our operations with related persons are carried out at comparable market prices and in the case of any deviations, such fact is taken into account in the tax reports.

Tax risk management

To assure an effective tax risk management, number of processes are in place such as:

- Handling tax-related topics by in-house by highly qualified tax experts who are provided with ongoing training.
- Maintain a strong control environment and tax risk framework to ensure compliance with tax laws.
- Providing continuous training to enhance tax risk understanding to all relevant parties.
- Ensuring that tax risk throughout the organisation is identified, managed and communicated.
- Monitoring of updates to changes in tax laws and their impacts on NLB and industry.
- Reviewing tax treatment of every new product or business decision before its implementation.

Financial Administration of the Republic of Slovenia has granted NLB d.d. a special tax status which is based on cooperation, transparency, understanding, voluntary payment of taxes, and mutual trust. This status can be granted only to trustworthy taxpayers who have appropriate internal tax controls in place. In 2021 only 11 big taxpayers had such status in Slovenia. This status, which is granted for the period of three years, was first granted to NLB in 2018 and was prolonged for another three years in 2021.

FATCA, CRS

The United States’ Foreign Account Tax Compliance Act (FATCA) and the Organisation for Economic Co-operation and Development’s Common Reporting Standard (CRS) are designed for greater transparency and to ensure that an individual wishing to “hide” assets from tax authorities will be unable to do so. FATCA focuses only on tax evasion by US Persons, whilst the CRS targets offshore tax evasion based on an account holder’s country of tax residence. We have been compliant with FATCA and CRS since their effective date.

Country by Country Reporting (CBCR)

In 2021, NLB Group fulfilled the criteria of EUR 750 million consolidated revenues for the County by Country Reporting. In accordance with the applicable legislation, NLB will submit the first report for the year 2022 to the Tax Administration by the end of the year 2023. In that report NLB will provide a breakdown of the NLB Group’s global revenue, profit before tax, income tax accrued and paid, and some other indicators of economic activities for each jurisdiction in which the NLB Group operates. Nevertheless, most data, which will be included in the CBCR, NLB already discloses in the Annual Report within the segment analysis section.

Future challenges

Tax team faces new challenges to meet rapidly changing compliance obligations, increase strategic role, contribute to the ESG agenda, and ensure it can clearly articulate the ways in which tax function can add value inside and outside of the organisation. Tax reporting processes must incorporate increased automation, better integrated data and processes, more analytic capabilities, and solid internal controls. These improvements will enable the tax function to deliver better quality output in less time, creating capacity to contribute more strategically to organisational decision-making.
2022 sustainability aspirations

The Group has committed to sustainability and has been enhancing the management of environmental and social risks of its operations. It also substantially increased the use of digital channels, improved customer experience, and aims to create a flexible local digital ecosystem for offering products and services.

In 2022, the Group intends to delve even deeper into the content and make sustainability more tangible throughout the Group. The resources are shifting towards a low-carbon economy and engaging with customers is key in financing the transition. An important step forward will be done by expanding the product portfolio with loans dedicated for supporting energy efficiency measures and renewable energy production and introducing a digital-only card. The Group aims to support global decarbonization goals and will consider joining the Net Zero Banking Alliance and aim to expand the Group’s measurements of emissions to full Scope 3. Implementation of climate-related and environmental risk management will continue to follow ECB and EBA guidelines. Moreover, participation in ECB climate-risk stress test exercise will provide additional important insights, which will surely have an effect on further adaptation of the existing Group’s business model. Effective integration of sustainability-related regulatory requirements will be important in 2022 for ESG disclosures and reporting (e.g., EU Taxonomy, Pillar III). Being aware of the market needs, the Group plans to make required steps in order to obtain the first ESG rating. However, all of the above mentioned cannot be achieved without highly motivated and adequately skilled teams, hence relevant trainings will be an important part of the working agenda.
General information on NLB Group's sustainability report 2021

Note that the NLB presents its sustainability report on an annual basis. The reporting period of NLB Group Sustainability Report equals to the reporting period of financial reporting, namely January 1st – December 31st. The reporting period of NLB Group Sustainability report 2021 is January 1st, 2021 – December 31st, 2021. No restatement to the previous reporting period (January 1st, 2020 – December 31st, 2020) has been done.

NLB Group Sustainability report 2021 is not subject to external assurance, however, it has been confirmed by the Group’s Management Board, as well as the highest governance body in the Group – Supervisory board. Independent external assurance of the Sustainability report is envisaged for the next year.

For more information on the report please contact sustainability@nlb.si.
Annex I: UN PRB self-assessment report

This self-assessment report is prepared based on the UNEP FI PRB template.

Principle 1: Alignment

We will align our business strategy to be consistent with and contribute to individuals’ needs and society’s goals, as expressed in the Sustainable Development Goals, the Paris Climate Agreement, and relevant national and regional frameworks.

Reporting and Self-Assessment Requirements

Describe (high-level) your bank’s business model, including the main customer segments served, types of products and services provided, the main sectors and types of activities, and where relevant the technologies financed across the main geographies in which your bank has operations or provides products and services.

High-level summary of bank’s response

The Group, headquartered in Ljubljana, is one of the largest banking and financial groups in Slovenia, with a strategic focus on selected countries in South-eastern Europe (Bosnia and Herzegovina, Serbia, Montenegro, the Republic of Kosovo, and Northern Macedonia). The Group’s presence on a 17 million people large market consists of 450 branches providing services to almost 2 million active clients. The Group is comprised of the leading and systemically most important bank in Slovenia, NLB d.d., seven subsidiary banks in SEE, several companies providing ancillary services (asset management, real estate management, leasing etc.), and a limited number of non-core subsidiaries in a controlled wind-down. The Group utilises a universal banking model and supports its clients through retail, corporate, and investment banking services.

In Retail Banking, the Bank is striving to get closer to its clients through anchor products and by offering personalised digital services to suit their lifestyle, like digital channels which are available 24/7. If customers wish to do business traditionally and stay in personal contact, the Bank continues to be present through its branch offices and the new mobile branch. Retail banking includes banking with individuals and micro companies, asset management (NLB Skladi), and one part of the new subsidiary NLB Lease&Go that deals with retail clients.

In Corporate Banking, the Group has been focusing on strengthening its market position as a systemic player. As a leading player, the Bank is looking to cover more complex, cross-border lending and find entry points to suit clients’ needs, whereas the Group is paying special attention to support large infrastructure projects with a focus on sustainability. Corporate and Investment Banking includes banking with Key corporate clients, SMEs, and Cross Border corporates, Investment Banking and Custody, Restructuring and Workout, and one part of the new subsidiary NLB Lease&Go that renders services to corporate clients.

Reference(s)/ Link(s) to bank’s full response/ relevant information

For more information, please refer to ‘Business report’ in the NLB Group Annual Report 2021 (Investor Relations nlb.si).
Reporting and Self-Assessment Requirements

Describe how your bank has aligned and/or is planning to align its strategy to be consistent with and contribute to society’s goals, as expressed in the Sustainable Development Goals (SDGs), the Paris Climate Agreement, and relevant national and regional frameworks.

High-level summary of bank’s response

Being aware of the climate change, the Group has been raising its focus on climate change, more specifically on sustainable operations, financing and risk management. After adopting the Sustainability programme in 2020, the Group set up the Group Sustainability framework in 2021 and laid the foundations for three pillars of sustainability: contribution to society, sustainable finance, and sustainable operations. Key SDGs in focus are SDG 3 (Good health and well-being), SDG 7 (Affordable and clean energy), SDG 8 (Decent work and economic growth), SDG 12 (Responsible consumption and production), and SDG 13 (Climate Action). Next to conducting impact analysis and target-setting, the Group adopted NLB Carbon footprint measurement and reporting policy and performed its first measurements for the period of 2019-2021, conducted the Group-wise sustainability online training programme for employees, and established the Sustainability committee. Additionally, a comprehensive ESG risk management framework has been set up throughout the last years and is constantly developing and adapting to the latest standards.

In 2022, as a signatory to the UN PRB, the bank will consider joining the Net Zero Banking Alliance UNEP FI and will discuss possibilities in obtaining ESG rating. We will continue to work on aligning our business strategy with the most relevant SDG goals, the Paris Agreement, risk management policies and to implement relevant national and EU legislation.

For more information, please refer to the NLB Group Sustainability Report 2021 [Sustainability (nlb.si)].
Principle 2: Impact and Target Setting
We will continuously increase our positive impacts while reducing the negative impacts on, and managing the risks to, people and the environment resulting from our activities, products, and services. To this end, we will set and publish targets where we can have the most significant impacts.

Reporting and Self-Assessment Requirements

Impact Analysis:
Show that your bank has identified the areas in which it has its most significant (potential) positive and negative impact through an impact analysis that fulfills the following elements:

Scope: The bank’s core business areas, products/services across the main geographies that the bank operates in have been considered in the scope of the analysis.

Scale of Exposure: In identifying its areas of most significant impact the bank has considered where its core business/its major activities lie in terms of industries, technologies and geographies.

Context & Relevance: Your bank has taken into account the most relevant challenges and priorities related to sustainable development in the countries/regions in which it operates.

Scale and intensity/salience of impact: In identifying its areas of most significant impact the bank has considered the scale and intensity/salience of the (potential) social, economic, and environmental impacts resulting from the bank’s activities and provision of products and services.

To conduct the Impact Analysis, we engaged external advisors which used UNEP FI Portfolio Impact Analysis - Tool for Banks. We identified the following business activities and countries of operation:

- Business activities (Consumer, Business, Corporate and Investment Banking) according to the UNEP FI.
- 6 main countries of operation (Slovenia, Bosnia and Herzegovina, North Macedonia, Montenegro, Kosovo, and Serbia).

After the first step, we identified Group Members’ countries’ needs. Adding sector/client impact mapping as a third dimension next to banking portfolio and country-specific needs, the final list of the key impact areas as depicted below was prepared by aggregating the top 3 positive and negative associated impacts areas per business line/employment:

- integrity & security of person,
- strong institutions, peace, & stability,
- health & sanitation,
- soil,
- housing,
- waste,
- justice.

To understand and take into consideration Group’s performance in all 13 impact areas, we created a set of questionnaires for internal stakeholders. Following the performance evaluation, we have then prioritised the impact areas: With the aim for key impact areas to comprehensively reflect our banking operations, i.e. context and specifics of our region, we included the materiality analysis in the prioritisation process, hence the overall score is based on three dimensions: performance, country needs, and materiality. In this way we also included the view of the most significant stakeholders, which we identified.

Based on the UNEP FI PRB methodology, the most significant impact the Group has with its products and services on societies, economies, and environments, are in the following areas:

High-level summary of bank’s response

To conduct the Impact Analysis, we engaged external advisors which used UNEP FI Portfolio Impact Analysis - Tool for Banks. We identified the following business activities and

The bank’s core business areas, products/services across the main geographies that the bank operates in have been considered in the scope of the analysis.

The most relevant challenges and priorities related to sustainable development in the countries/regions in which it operates.

Identifying and disclosing its areas of most significant (potential) positive and negative impact.

Identified strategic business opportunities in relation to the increase of positive impacts/reduction of negative impacts.

Climate: Composition of the global atmosphere and its exposure to greenhouse gas (GHG) emissions as a direct factor contributing to climate change.

Resource efficiency & security: Efficient use of limited, non-renewable natural resources (which cannot be regenerated after exploitation) and renewable natural resources (which can return to their previous stock levels by natural processes of growth or replenishment) in the process of exploiting nature for production and consumption purposes. Can also be read as resource security.

Inclusive, healthy economies: Development and creation of sustainable, diverse, and innovative markets that add value to society and the economy. This includes under-served social groups: full and fair accessibility to labour markets, finance and entrepreneurship, and, more generally, economic opportunity. It also includes, but is not limited to, access to affordable, effective, and safe financial services for individuals as well as micro, small and medium-sized enterprises.

Reference(s)/ Link(s) to bank’s full response/ relevant information
For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability.nlbsi).

Please provide your bank’s conclusion/statement if it has fulfilled the requirements regarding Impact Analysis.

We have taken all necessary steps to conduct an in-depth Impact Analysis. The final report of the Impact analysis of the Group was presented to the NLB Group Sustainability Committee. The Bank will continuously strive to increase positive and reduce negative impact while managing the risks to people, society, and economies, primarily on the above-mentioned top impact areas, however, we will also pay special attention to the remaining identified impact areas.
Reporting and Self-Assessment Requirements

Target-setting
Show that the bank has set and published a minimum of two Specific, Measurable (can be qualitative or quantitative), Achievable, Relevant and Time-bound (SMART) targets, which address at least two of the identified “areas of most significant impact,” resulting from the bank’s activities and provision of products and services.

High-level summary of bank’s response
In collaboration with our advisors, we examined the suitable KPIs and the plans and came up with four targets. Three of the targets are related to Climate and Resource efficiency/security impact areas and one is related to the Inclusive, healthy economies impact area.

Targets and their impact area and alignment with SDGs:

- The first target: by the year 2025, the Group will decrease the number of paper prints in its operations by 50% compared to the year 2019.
  Impact area: Resource efficiency/Security
  SDG 12-Responsible consumption and production
  SDG 13-Climate action

- The second target: by the year 2025, the share of active digital retail users in the Group will be 55%.
  Impact area: Inclusive & Healthy Economies
  SDG 8-Decent work and economic growth
  SDG 13-Climate Action

- The third target: by the year 2030, 75% of all-electric energy used in the Group will come from zero-carbon sources.
  Impact area: Climate
  SDG 8-Decent work and economic growth
  SDG 13-Climate Action

- The fourth target: by the year 2030, the volume of new sustainable financing in the Group will be at least EUR 785 million.
  Impact area: Climate
  SDG 8-Decent work and economic growth
  SDG 13-Climate Action

Reference(s)/Link(s) to bank’s full response/ relevant information
For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability.nlb.si).

Please provide your bank’s conclusion/statement if it has fulfilled the requirements regarding Target-setting.

NLB set four SMART Targets with a clear link to support the above-mentioned SDGs. All targets will be reported on and if needed revised yearly. We will continue to review our targets, expand them, and especially work on further understanding our (potential) negative impact of the set targets on other dimensions of SDG goals.
Reporting and Self-Assessment Requirements

Plans for Target Implementation and Monitoring

Show that your bank has defined actions and milestones to meet the set targets.

Show that your bank has put in place the means to measure and monitor progress against the set targets. Definitions of key performance indicators, any changes in these definitions, and any rebasing of baselines should be transparent.

High-level summary of bank’s response

Plans and roadmaps to achieve some of the above-mentioned targets are already in place and necessary steps and activities, have already been clearly defined. Next steps, to mention the most important ones, regarding the implementation of the targets are:
- to review the internal policies and procedures,
- to build internal capacities,
- to continue developing new products and accelerate the marketing of the existing products,
- to redirect customers to digital channels,
- to raise awareness internally and externally regarding paper consumption,
- to actively search new opportunities on the markets for sustainable financing,
- to revise contracts with existing energy suppliers throughout the Group.

Reference(s)/ Link(s) to bank’s full response/ relevant information

For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability.nlbi.si).

Please provide your bank’s conclusion/statement if it has fulfilled the requirements regarding Plans for Target Implementation and Monitoring. All targets, implementation activities and milestones for achieving the targets will be regularly monitored by the NLB Group Sustainability Committee and reported to the Supervisory Board.
Reporting and Self-Assessment Requirements

Progress on Implementing Targets

For each target separately:
Show that your bank has implemented the actions it had previously defined to meet the set target.
Or explain why actions could not be implemented/needed to be changed and how your bank is adapting its plan to meet its set target.

High-level summary of bank’s response

The Bank will annually report on the progress made against the targets set on its material issues through its annual NLB Group Sustainability report.

Please provide your bank’s conclusion/statement if it has fulfilled the requirements regarding Progress on Implementing Targets.

The bank set targets for the first time and will therefore report on the progress towards achieving them alongside with necessary steps taken in its next sustainability report.

Principle 3: Clients and Customers

We will work responsibly with our clients and our customers to encourage sustainable practices and enable economic activities that create shared prosperity for current and future generations.

Reporting and Self-Assessment Requirements

Provide an overview of the policies and practices your bank has in place and/or is planning to put in place to promote responsible relationships with its customers. This should include high-level information on any programmes and actions implemented (and/or planned), their scale and, where possible, the results thereof.

High-level summary of bank’s response

The Group is responsible to its clients, employees, and the social environment, and aims to become their responsible and diligent mentor. For this purpose, several activities and procedures are carried out within the NLB Group, some of which are:

The NLB Group’s Code of Conduct establishes uniform rules of conduct for all Group employees, as well as for the contractors acting on behalf of the NLB Group. It defines the values and basic rules of ethical business conduct, which the Group respects, promotes, and expects to be followed in the whole Group. Our values and beliefs support our long-term goal of continuously improving the culture of our daily operations in the countries where the NLB Group is present.

Within the framework of the programme of ensuring business compliance, the Group also deals with the ethics and integrity of the organisation. Such a programme encourages employees and other stakeholders to conduct business which is consistent with a strong positive organisational culture. To promote responsible and ethical conduct by the employees, as well as other stakeholders, we regularly carry out mandatory training in all areas within NLB Compliance and Integrity (AML/CFT, prevention of fraud, corruption and conflict of interest, personal data protection, protection of information, regulatory compliance management, physical security, and a code of conduct).
The Bank remains the leader in the Slovenian market because of the knowledge, experience, and understanding of customers' needs, resulting in many solutions that pave the way for new customers and change customer habits. Every year, customer experience is confirmed by the customer satisfaction index (CSI). For the year 2021, CSI remains stable and well above the competition. Furthermore, clients also expressed a high level of trust and loyalty.

The Committee for Existing and New Products in NLB is in charge of approving and monitoring products, while also focusing on risks related to the product and the method of managing those risks. NLB is bound to only offer products and services that create value for our clients and the shareholders and meet the client's needs. The procedures of approving products and services apply to all new product offers, as well as various existing products. The key control functions must be involved in the process of product development and monitoring, including the compliance function, since every product must be compliant with the requirements of the regulations, inter alia, in the area of consumer protection, personal data protection, and prevention of money laundering and terrorist financing.

The bank has several contact points and a 24/7 call centre through which it is available for all questions, inquiries, complaints from its customers (for more details, please see our website nlb.si/contact). Moreover, in the year 2021, we established a single contact point for all sustainability-related inquiries and issues (sustainability@nlb.si).

Reference(s)/ Link(s) to bank’s full response/ relevant information

For more information, please refer to:
- Code of Conduct (nlb.si)
- Compliance and Integrity (nlb.si)

For more information, please refer to the ‘Digitalisation and improved client experience’ in the NLB Group Annual report 2021 (Investor Relations (nlb.si)).

Reporting and Self-Assessment Requirements

Describe how your bank has worked with and/or is planning to work with its clients and customers to encourage sustainable practices and enable sustainable economic activities. This should include information on actions planned/implemented, products and services developed, and, where possible, the impacts achieved.

High-level summary of bank’s response

We place our clients at the centre of everything we do. One of the key efforts is improved availability and inclusiveness for all clients. Based on these criteria and considering the local context of our different home markets, the following sustainability-focus domains have been defined on the NLB Group level.

The Bank has strong focus in providing progressive digital solutions (Packages ‘My World’ and ‘Digital’) and explores the best options to improve customers’ experience in gathering required documentation and also in cloud-based signing of the documentation, all while offering 24/7 contact with the Bank online through video call. In financing, we emphasize the importance of ESG criteria and support our clients in the implementation of sustainable infrastructure projects to achieve global and national energy and climate goals. In each organisational unit dealing with client financing, we have a designated coordinator for sustainable financing, who has in-depth knowledge in ESG risk policies and methodological framework and can thus best advice clients and take into consideration the following factors:
- adhering to NLB’s Lending Policy
- having a low impact on the environment and have the potential to replace high impact activities (e.g., renewable energy) and reduce impact form other activities
- making a positive environmental contribution.

Stimulating entrepreneurship

We are committed to entrepreneurship, innovative thinking, and economic growth. We understand that by supporting innovative ideas and projects, we can contribute to economic growth, which is one of our fundamental objectives. Over the entire development process, new, innovative business solutions are and will be checked against the Sustainability Framework, which allows us to launch sustainable products and services that meet clients’ needs. Initiatives were already launched, and the Group will continue working on
other business solutions that contribute positively to these societal challenges. One of the most recognised projects of 2020 and 2021 in the entire region of SEE is the #HelpFrame project. With the #HelpFrame project, we offered our own advertising space to 258 entrepreneurs, farmers, and micro and small businesses, and thus helped them to reach potential customers, thereby making an important contribution to strengthening the domestic small business.

**Supporting financial literacy and financial inclusion**

Financial advice: helping clients make the right choices through good and transparent advice, and clear communication.

Financial behaviour: using analytics to understand and respond to client behaviour more effectively. Financial education: raising citizens’ understanding of financial concepts and products. And that also means young people, since tomorrow’s financial consumers should be able to make carefully thought-out choices. Financial inclusion: developing financial products and services that promote the financial inclusion of all citizens.

**Building partnerships**

We are committed to developing partnerships for a more advanced, innovative, and stimulating environment in the markets in which we operate. We regularly interact and are members of the following professional and business associations:

- Sustainable finance expert group at the Slovenian Banking Association,
- Sustainable finance expert group at the European Banking Federation,
- CER – Sustainable business network Slovenia,
- Commission for Sustainable growth at AmCham Slovenia,
- UNEP FI PRB working groups.

Reference(s)/ Link(s) to bank’s full response/ relevant information

For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability (nlb.si)).
Principle 4: Stakeholders
We will proactively and responsibly consult, engage, and partner with relevant stakeholders to achieve society’s goals.

Reporting and Self-Assessment Requirements

Describe which stakeholders (or groups/types of stakeholders) your bank has consulted, engaged, collaborated, or partnered with for the purpose of implementing these Principles and improving your bank’s impacts. This should include a high-level overview of how your bank has identified relevant stakeholders and what issues were addressed/results achieved.

High-level summary of bank’s response

As part of the process of undertaking our impact and materiality analysis, we consulted with our internal relevant organisational units, consulting agency, banking subsidiary members to discuss our assessment of the most relevant challenges and priorities related to sustainable development in the country. Stakeholder mapping was carried out as the first step of the materiality analysis, as it is essential to understand, which stakeholders’ groups are the most relevant to the bank’s operations. Our analysis was based on analysis of our operations, peers’ analysis, and overview of the key actors in the banking sector. Based on this input, the recognized six main stakeholder groups are: employees, private clients, business clients, suppliers and contractual partners, regulatory authorities, and investors.

We engaged with these stakeholders through substantial online survey, where they prioritised material issues for the Group. Survey was carried out in all Group member countries.

Reference(s)/ Link(s) to bank’s full response/ relevant information

For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability (nlb.si)).
Principle 5: Governance & Culture
We will implement our commitment to these Principles through effective governance and a culture of responsible banking.

Reporting and Self-Assessment Requirements
Describe the relevant governance structures, policies, and procedures your bank has in place/are planning to put in place to manage significant positive and negative (potential) impacts and support effective implementation of the Principles.

High-level summary of bank’s response

NLB Group Sustainability Governance Structure
According to the Articles of Association of the NLB d.d., the bank has a commitment to consider the environmental and social impacts of its business, with the aim of ensuring sustainable development of the bank, included as one of the goals of the bank (nlb.si/corporate-governance).

With the adoption of the NLB Group sustainability programme at the end of 2020, the NLB Group has moved from the raising awareness phase to the phase of actively implementing sustainability elements into the business model.

We take our responsibility towards society and local economies very seriously and fully understand that we can only provide a positive impact if we do banking in a way that serves the United Nations Sustainable Development Goals (UN SDG).

Sustainability is anchored at different levels within the bank (Management Board, Supervisory Board and Group level...), guaranteeing that it receives attention from the highest decision-making bodies while also being broadly integrated in our daily operations.

In the Q3 2021, the NLB Group Sustainability Committee was established. Sustainability Committee acts primarily as a consultative body and as a decision-making body of the Management Board of NLB d.d. Therefore, NLB has put in place 4-level NLB Group Sustainability Governance Structure, as follows:

The Bank has established a comprehensive framework for sustainable management, starting by sponsoring the matter at the level of the NLB SB, which, significantly contributes to the implementation of sustainability. The SB regularly monitors the implementation of ESG factors and discusses the topic on regular basis.

Sustainability Team within Strategy and Business Development Division of the NLB oversees Group-wide sustainability agenda and it is tasked with driving the culture, coordinating initiatives, measuring the impact and reporting on progress. The team monitors implementation of the strategy and regularly informs the Sustainability Committee, the MB and the SB on progress.

Ad hoc working groups are being set up in the bank to introduce various elements of sustainability. Their composition varies according to the area of sustainability considered. ESMS Officers have been appointed in our banking members and report regularly to local boards. They come from within the risk management line and ensure the ESMS is properly implemented organisation wide.
NLB Group Code of Conduct
The Code defines values and fundamental principles of ethical business conduct that we respect, promote, and expect in the NLB Group. It also sets the rules that every employee in the NLB Group must understand and respect and it reflects the standards that we are expecting our relationship to the rest of the stakeholders. Our long-term goal is to constantly improve the culture of our daily operations, which is essential for achieving the long-term trust in countries in which the NLB Group is present. By incorporating everything we do, we contribute to the positive development of the environment.

Lending Policy
We have also launched our updated NLB Group lending policy with a chapter devoted to addressing the economic activities with categories such as prohibited, restricted, and normal activities. The NLB Group Lending Policy was upgraded with the Exclusion List from EBRD Environmental and Social Policy (2014) and MIGA Environmental and Social Exclusion List (signed with NLB Group members) to which the bank must strictly adhere.

Policies
Key ESG factors and key SDGs goals of the bank are incorporated in the following internal policies of NLB d.d.:
NLB d.d. is planning to make changes to the existing policies, as follows:

Corporate Governance Policy of NLB d.d. will be changed due to recent changes of the Slovenian Corporate Governance Code for Listed Companies that became valid on 1 January 2022 and will be first used for preparation of the Corporate Governance Statement for the business year 2022.

Remuneration Policy for Members of the Supervisory Board and Members for the Management Board of the NLB d.d. is to be aligned with recently changed Companies Act (ZGD-1) and recent EBA Guidelines on sound remuneration policies under Directive 2013/36/EU (EBA/GL/2021/04 of 02/07/2021).

Policy on the Provision of Diversity of the Management Body and Senior Management will be renewed due to recent changes of the Companies Act (ZGD-1).

All necessary changes to internal policies are performed regularly, in accordance with the ECB and EBA Guidelines, other relevant EU legislation and state’s legislation, as well as in accordance with the established best banking practices.

Reference(s)/Link(s) to bank’s full response/ relevant information
For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability.nlb.si).
Reporting and Self-Assessment Requirements

Describe the initiatives and measures your bank has implemented or is planning to implement to foster a culture of responsible banking among its employees. This should include a high-level overview of capacity building, inclusion in remuneration structures and performance management and leadership communication, amongst others.

High-level summary of bank’s response

Our approach to responsible and sustainable banking is regularly and actively addressed by our Management Board as well as our Supervisory Board. Our CEO, who is a passionate advocate, regularly addresses employees on this topic, whether during regular meetings with employees live or indirectly during other public appearances, interviews, etc. In 2021, we developed and conducted online sustainability training for all employees of the NLB Group. The training includes The Principles for Responsible Banking and the role of all in their implementation.

Sustainability Team regularly participates in all UNEP FI PRB workshops, webinars, and is also part of the working group, hence having the knowledge and latest information, which can then be adequately implemented in the Group. To appropriately spread the sustainable culture and build capacity within the Group, ESG coordinators have been named in the Bank’s subsidiaries. Further on, we regularly communicate and promote sustainability topics, inform employees about the progress, and try to ensure they would truly start to act in accordance with sustainable principles.

Reference(s)/ Link(s) to bank’s full response/ relevant information

For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability (nlb.si)).

Reporting and Self-Assessment Requirements

Governance Structure for implementation of the Principles Show that your bank has a governance structure in place for the implementation of the PRB, including:

1. target-setting and actions to achieve targets set
2. remedial action in the event of targets or milestones not being achieved or unexpected negative impacts being detected.

High-level summary of bank’s response

The NLB Group Sustainability Governance Structure is explained in detail above.

Supervisory Board of NLB d.d.

Within the NLB Group Sustainability Governance Structure the Supervisory Board of NLB d.d. addresses the implementation of sustainability topics. Due to the growing importance of the topic, the Supervisory Board of NLB d.d. monitors the implementation of sustainability issues at almost every meeting and adopts relevant decisions regarding the agenda.

Powers of the NLB Group Sustainability Committee (SC)

At the level of NLB d.d. oversees the integration of the ESG factors to the NLB Group business model in a focused and coordinated way across the bank and issues opinions, recommendations, initiatives, and takes relevant decisions when needed.
SC is a forum where we discuss, develop and approve sustainability strategies, policies, initiatives, methodologies, KPIs, and other relevant procedures of the NLB Group.

SC performs operational oversight of the implementation of sustainability activities, including the regulatory requirements, contractual obligations, investors’ needs, the Bank’s Environmental and Social System (ESMS), ESG-related KPIs, and sustainability commitments, which influence the ESG performance of the NLB Group.

It also oversees the sustainable finance products portfolio development in all three areas: consumer, business, corporate, and oversees.

According to Rules of Procedures of the NLB Group Sustainability Committee the SC is responsible, among others:

Perform oversight of the sustainable loan portfolio (for the purpose of sustainable bond issuance): (i) confirm the eligibility criteria for green/social projects, (ii) confirm green/social loans for their inclusion into the sustainable loan portfolio, (iii) adoption and updates (when necessary) of the Sustainable Bond Framework, (iv) oversight of the implementation of the Sustainable Bond Framework, including management of proceeds, reporting and external review.

Take relevant decision on sustainability-related topics, when needed.

Sustainability Team
Sustainability Development unit at NLB d.d. oversees the Group-wide sustainability agenda and it is tasked with driving the culture, coordinating initiatives, measuring the impact and reporting on progress. The team is responsible also for developing the sustainability strategy and implementing it across the NLB Group.

Sustainability working groups
Ad hoc working groups are being set up in the bank to introduce various elements of sustainability. Their composition varies according to the area of sustainability considered.

Target setting
Targets will be adopted by the Management Board and the Supervisory Board. They will be incorporated in the Sustainability Report of the NLB Group 2021 and published on our website.

Remedial actions
In the event, milestones could not be achieved, or unexpected negative impacts are being detected the SC would, according to Rules of Procedure of the NLB Group Sustainability Committee, take an adequate decision on sustainability matter and the Supervisory Board of the NLB d.d. would be informed and if needed would act appropriately. Namely, please note, that NLB d.d. has a two-tier system of corporate governance. According to provisions of the Articles of Association of the NLB d.d. and relevant provisions of the Companies Law (ZGD-1) critical concerns in general should be communicated as follows:

- at the first instance to the Management Board and
- to the Supervisory Board, as a highest governance body.

Reference(s)/ Link(s) to bank’s full response/ relevant information

For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability (nlb.si)).

Please provide your bank’s conclusion/statement if it has fulfilled the requirements regarding Governance Structure for implementation of the Principles.

According to the above, we are of the opinion that the NLB Group established an appropriate governance structure (NLB Group Sustainability governance) for ensuring that the UN PRBs are effectively implemented, including the setting and monitoring of targets if needed to take appropriate actions.
Principle 6: Transparency & Accountability
We will periodically review our individual and collective implementation of these Principles and be transparent about and accountable for our positive and negative impacts and our contribution to society’s goals.

Reporting and Self-Assessment Requirements
Progress on Implementing the Principles
- Show that your bank has progressed in implementing the six Principles over the last 12 months (up to 18 months in your first reporting after becoming a signatory) in addition to the setting and implementation of targets in minimum of two areas.
- Show that your bank has considered existing and emerging international/regional good practices relevant for the implementation of the six Principles for Responsible Banking. Based on this, it has defined priorities and ambitions to align with good practice.
- Show that your bank has implemented/is working on implementing changes in existing practices to reflect and be in line with existing and emerging international/regional good practices and has made progress on its implementation of these Principles.

High-level summary of bank’s response
In its first 18 months since becoming a signatory, the Bank has taken steps to implement the PRB. Key points of this progress include the following:

The NLB Group Sustainability framework was published as a strategic document that highlights our ambitions and commitments to the integration of sustainability in the Group’s business model. Besides providing an alignment of the Group’s sustainability approach with the UN’s Sustainable Development Goals (UN SDG), it offers stakeholders a list of sustainable economic activities promoted by the Group, and therefore sets out a basis for classifying financing as sustainable. Moreover, the document addresses in detail the Group’s corporate sustainability governance structure.

To keep the ‘double materiality’ concept in the focus for the year 2021, the Group decided also for a traditional (GRI) materiality analysis as a complementary to the impact analysis, since GRI materiality and stakeholder identification can be used to further corroborate impact analysis findings and hence help with the setting of priorities.

In the second half of 2021, ‘The NLB Group Carbon Footprint Measurement and Reporting Policy’ was adopted as an internal policy on a calculation of carbon footprint of the Group’s operations, and so provides the key methodological approach on why and how the carbon footprint reporting for the Group will be carried out.

Upgraded NLB Group Lending Policy with the MIGA and EBRD Exclusion List and implemented in credit approval process.

We have identified some existing and emerging good practices in the market, mainly within our peer group. Some of these practices were relevant to the Bank’s operations based on a comparison of sustainable strategies, methodologies and setting targets for GHG emissions, green financing products and reporting. These good practices serve as our next steps in considering joining the Net Zero Banking Alliance, measuring GHG emissions and setting CO2 emissions targets, green financing targets, and establishing ESG internal policies.

Reference(s)/ Link(s) to bank’s full response/ relevant information
For more information, please refer to the NLB Group Sustainability Report 2021 (Sustainability (nlb.si)).

Please provide your bank’s conclusion/statement if it has fulfilled the requirements regarding Progress on Implementing the Principles for Responsible Banking

The Bank has taken very important steps in implementing the Principles over the first 18 months of becoming a signatory. Key steps include the issuing of the first NLB Group Sustainability report, publishing our NLB Group Sustainability framework, conducting Impact and Materiality analysis, executing the first Group carbon footprint measurement, and upgrading internal policies in the area of risk management, such as the NLB Group Lending Policy upgraded with the MIGA and EBRD Exclusion List, etc.
INDEPENDENT VERIFICATION OPINION OF CARBON FOOTPRINT REPORT
NLB GROUP

INTRODUCTION
Jožef Stefan Institute (Energy Efficiency Centre) has prepared this verification opinion for the Carbon Footprint Report of NLB Group for the period from January 1, 2020 until December 31, 2020.

NLB d.d. was responsible for preparation of carbon footprint and data collection for NLB Group. Jožef Stefan Institute was responsible for verification assessment and providing an independently expressed public opinion on the reported carbon footprint.

OBJECTIVES
Verification objectives are to independently review and confirm:
- Methodological approach for calculation of carbon footprint;
- Conformity with verification criteria, requirements from applicable standards or programmes for carbon footprint reporting, in scope of the verification;
- Reported data are accurate, complete, consistent and without instances of non-conformities;

VERIFICATION SCOPE
Carbon footprint report in accordance with GHG Protocol, Scope 1, 2 and 3 (limited scope) for the reporting period from January 1, 2020 until December 31, 2020.

ORGANIZATION BOUNDARIES FOR GREENHOUSE GAS EMISSIONS
The boundaries of the carbon footprint report included the properties where NLB d.d. has sole ownership and those properties are members of NLB Group:
1. NLB d.d.
2. NLB Banka d.d., Sloboj
3. NLB Banka a.d., Podgorica
4. NLB Banka a.d., Sarajevo
5. NLB Banka a.d., Sarajevo
6. NLB Banka a.d., Sarajevo
7. NLB Banka a.d., Podgorica
11. NLB Srbija a.d., Beograd
12. NLB Montenegro a.d., Podgorica
13. NLB Crna gora a.d., Podgorica
14. NLB Kosovo a.d., Pristina
15. REAvN d.o.o., Belgrade
16. RIA d.o.o., Podgorica
17. SRT d.o.o., Sarajevo
18. NLB Croatia d.o.o., Zagreb
19. NLB Croatia d.o.o., Split
20. BanK d.o.o., Sarajevo

Greenhouse gas emission sources of NLB Group include:
- direct GHG emissions (Scope 1) from following sources: combustion fuels (indirect), light fuel oil (LFO), heat (owned), vehicles fleet (operated and owned), electric power (reference and limited scope);
- indirect GHG emissions (Scope 2) from electricity use (generation and market scope) and district heat uses;
- indirect GHG emissions (Scope 2) from employee commuting.

REPORTING PERIOD

VERIFICATION CRITERIA

VERIFICATION PROTOCOL

LEVEL OF ASSURANCE
Reasonable level of assurance, Maturity level 5%.

VERIFICATION METHODOLOGY
Jožef Stefan Institute has assessed highest level of assurance focusing on areas most important for NLB d.d., NLB Group and its stakeholders.

Following methods were used in process of verification of GHG emissions, data management, sustainable development and methodological approach for carbon footprint reporting:
- review of documentation, evidences of data and sources for energy consumption and GHG emissions.
Verified Greenhouse Gas Emissions

Verification Independence

Josef Stefan Institute verified the carbon footprint report of NLB Group as independent organization and approved GHG emissions with its own calculations. During verification process a balanced approach to all stakeholders was applied.

Verification Conclusions

Josef Stefan Institute has following conclusions to methodological report and carbon footprint report for NLB Group:

- The report is complete and conforms to GHG Protocol requirements, scope 1, 2 and 3.
- NLB d.d. has conducted scope definition and GHG emissions calculations according to the GHG Protocol;
- Methodological report appropriately defines baseline data, emission factors and other data according to requirements of GHG Protocol and ISO 14064;
- Carbon footprint report for NLB Group for years 2019, 2020 in 2021 correctly reports GHG emissions at the level of each scope, total calculation and emission indicators (per employee, per m²);
- Reported data are exact, complete, consistent and without mistakes of nonconformities;
- Reported carbon footprint of NLB Group was confirmed by own calculations of Josef Stefan Institute.

Verification Opinion

Based on the described verification procedures Josef Stefan Institute is confirming the carbon footprint report for NLB Group is:
- Prepared in accordance with the requirements of GHG Protocol (guidance for reporting on scopes 1, 2 and 3) and GHG reporting guidelines from ISO 14064:2018 (Greenhouse gases);
- Correctly and completely represents data on GHG emissions included in carbon footprint report for NLB Group for scopes 1, 2 and 3 for the period from January 1, 2019 until December 31, 2021.
